18th February 2010

TO WHOMSOEVER IT MAY CONCERN

We have been visiting, studying, observing and interacting for many years the mining and processing activity pertaining to Granite industry. We are thoroughly convinced that the Indian Mining and Processing Sector (Granite) is robust and vibrant using cutting edge technology to meet the demanding global standards and they are second to none.

We are absolutely satisfied that they do not employ child labour whereas the industry is steadfast to empower the child with the knowledge and education by constructing schools and create infrastructure for better tomorrow.
