████████@████████

Experience Summary:

Result oriented, highly technical and business focused application development manager with over 13 years of experience. Ability to break complex tasks into smaller deliverable chunks has helped me to successfully plan and implement large scale integration projects.

Core Competencies:

Project & Out-Source Team Management – Actively manage Sri Lanka developers to prioritize their work and deliverables. **Cross-Functional Management** – Co-ordinate with IT infrastructure, business users, developers and vendors. **Full Life Cycle Development** – Worked from the inception to delivery of many projects. **Database Administration and Release Management** – Manage Change Control for our ERP (Navision) system.

Programming Skills

Languages	: T-SQL, Integration Services (SSIS), DTS, Analysis Services (SSAS), Reporting Services (SSRS), SQL Server (2008/2005/2000), Visual Basic, C# Dot Net, ASP, HTML, Java, Macros, VB / Java Script & UNIX.
GUI Tools	: Crystal Reports, Report Builder and Radius
Messaging Server	: NEON, IBM MQ-Series
RDBMS	: SQL Server (2008/2005/2000), Sybase, Oracle, DB2 and Gupta SQL.
Certifications	: Dot Net, UML, Java Script.
Applications	: Microsoft CRM, Microsoft ERP (Navision) and home grown ERP.
Third Party Software	: Precision Point Business Warehouse (BI Tool), IRESS Trading System, Thomson First Analytics, Bloomberg, DataStream and Reuters.

Employment History:

Application Development Manager

Basic Chemical Solutions, Redwood City, CA   **Apr 2007 –Present**
Tools: SQL Server 2008/2005//2000, SSIS, Reporting Services (SSRS), Analysis Services (SSAS), EPR application – Navision, Microsoft CRM, Radius reporting tool, Report Builder, VB 6.0, HTML, C# dot net

Highly motivated, business focussed regarded as a key player, creative problem solver and skilled leader who is an expert in process improvement and strategic planning.

Key Projects:
- Vendor cost implementation – I led this project to implement a core change to our ERP process saving 20% of invoicing time, improved the accuracy by 10%, prevented wrong billing and provided a platform to store the vendor prices in a central location.
- CRM Phase 1- I delivered this project and managed the scope and rolled out the client tool to 70 sales reps and managers. Key highlights were to build a strong security model and build an interface with our ERP system.
- ERP upgrade and SQL Server Migration – I led a team of 10 to implement and upgrade our ERP (Navision) to a new version and the migration of SQL Server 2000 to SQL Server 2005. The implementation boosted the performance by 60%, increased scalability and supportability of our ERP system.
- Travel & Entertainment (T&E) Expense reporting – I managed and developed the entire solution giving visibility to T&E expense reporting for our sales managers thus saving 10% cost for the company.
- Source Code controls (Visual Source Safe) – Initiated and implemented version control companywide.

- Responsible for tactical DBA (Database Administrator) requests and many other internal IT systems.

Senior SQL Developer
Intel Corporation, Santa Clara, CA **Oct 2006 – Apr 2007**
Tools: SQL Server 2005, SSIS, Reporting Services (SSRS), Analysis Services (SSAS), Oracle, SQL Migration Agent, Teradata

I successfully led the migration of their legacy systems to SQL Server 2005. Jointly owned the design and architecture of the SSIS logging framework and worked with the architecture team to implement their strategy. Responsible for analysis and reporting to meet the business needs.

Key Achievements:
- Reduce the development release cycle by 30% (from development to production release)
- Reduce the overall nightly refresh time by 3 hours from 8 hours.
- Fine tune the queries, improve the performance on database by 5%.
- Trained 10 IT developers and support staff on SSIS framework.

Senior Developer/Lead
AMP Capital Investors, NSW, Australia **Mar 2001 – Oct 2006**
Expertise: Equities and Fixed Interest
Tools: Visual Basic 3-6, C# .NET, Sybase, SQL Server 2000/2005, DTS Package, Integration Services 2005(SSIS), ASP, Java Script, VB Script, UNIX, HTML, UIP Design pattern, XML, NEON,
Third Party Tools: IRESS, First Call, Eclipse, Bloomberg and Reuters.

Teamed with the equity portfolio managers and dealing desk to support and enhance the trading platform.
I have a proven track record of delivering many projects in a fast, complex business environment; ability to work under pressure with tight deadlines; excellent communication skills and co-ordinating with teams and key business users to delivery rich functionality and enhanced customer experience.

Key Projects:
- Portfolio Valuation – Integrated our back office into the overall architecture (data-integration layer); identified and transformed 100gigs of data; developed SSIS packages and designed client facing reports.
- Order enhancement – I led this project and reduced the workload of financial analyst by developing "Cancel and Rebook" philosophy with journal entries by 10%. Automated the GUI testing by implementing "Test complete" tool thus saving 30% of testing time.
- Integration environment setup – Project managed and co-ordinated with development teams, DBA's and liaise with the infrastructure team to build a parallel development environment.
- Product and Client Intelligence (PACMAN) – Functional lead to integrate 2 web portals to a single user interface. I provided critical business knowledge and used C# .Net, n-Hibernate to enhance rich user experience and developed a framework for data access layer.
- New Zealand front office integration – Key developer interactive with the trading desk to automate their spreadsheet world into our portfolio management interface.
- Quantitative database solution – I lead this project by converting access database to SQL Server 2000 and translated complex quantitative calculations that predict top quality stocks to buy/sell.
- Hedge funds – Key developer to enhance the functionality of order management system by enabling "Short Sell" of equities instruments, extensive involvement with coding, testing and business analysis.
- Fund extracts – A fast paced project that won me a "**World Class Award**" for writing an extract process for confirmed and unconfirmed trades for equities and futures/options instruments that resulted in smooth transition of funds.
- Received "World Class Award" for **Outstanding Performance** for the year 2003 from AMP Capital Investors.

Systems Engineer
    Global Tele Systems Ltd., Mumbai, India   **Aug 2000 – Dec 2000**
Expertise – ERP Implementation
Tools: Visual Basic 6, COM/DCOM, Crystal Reports 7, and Oracle 8

Lead a team of 5 developers for Crystal reports of an ERP system developed for Zip Telecom Ltd. My key task was to implement standards and define the format for customer facing reporting needs.

Software Executive
    Byzan Systems Pvt. Ltd.   Client – Citibank, Mumbai, India   **Nov 1998 – Aug 2000**
Tools: Visual Basic 4, Crystal Query & Reports 6, SQL Server 7, Gupta SQL, Oracle 7
Teamed with Citibank business users to support their operational needs that empowered them to make smart business decisions. I also supported software called "Paylink" that prints customer checks.
Designed and implemented purge for SQL Server database thus improving efficiency and response time by 30%.

EDUCATION:
Diploma in Financial Services/Planning from Securities Institute Academy (SIA), Sydney. – (2003-2005)
Bachelor of Engineering (B.E.) - Information Science & Engineering from B.M.S. College of Engineering, Bangalore (Bangalore University) India: (1994 - 1998).
