RIN 1210-AB33 is abhorrent! Q13 in particular on requiring the annuitization of retirement plans is theft!

1) Basically Uncle Sam is trying to plunder retirement accounts through an annuitization style Ponzi scheme much like Social Security.

2) IRA's, 401(k)s, and other such retirement vehicles are the direct result of government meddling and never should have existed in the first place.

3) Government mandated retirement plans have been taken over and looted by an organized crime syndicate known as the Financial Industry.

4) DOL, Treasury, and the entire US Federal government, are in bed with the Financial Industry, led by Goldman Sachs et al, and all are owned by an elite group of powerful individuals and families, the primary shareholders of the privately held Federal Reserve banks.

5) Treasury is especially filled with financial terrorists whose sole purpose is to consolidate wealth and power into the hands of the elites.

6) The United States is bankrupt by design, its imminent collapse having been engineered by the elite, and no amount looting and no power on earth can reverse it or stop it.

7) RIN 1210-AB33 is designed to further steal from the American people to make them more submissive as the United States implodes and succumbs to a single global economic and monetary system enforced by a planetary government under the control of the elite.

DOL and Treasury will find that citizens are no longer so easily fooled, are in a particularly foul mood, are increasingly prepared to mount fierce revolt against tyranny, and that RIN 1210-AB33 will provoke many more furious responses such as this.
