Dear sir/madam,

Do not in ANY WAY take money from my retirement fund and force it into
an annuity of your choosing. This would be outright government theft
and would mark the true convergence of our country with the likes of
such well run Kleptocracies as Argentina. It would only benefit you
spendthrift political hacks and the current crop of Banksters who have
co-opted our government.

Any elected official who works to make this possible will be thrown out
of office by me and the millions of citizens whose savings are
threatened by this proposal. The new crop of elected officials will
then fire you bureaucrats in the treasury who helped make this
possible.

So STOP. Go no further.

Chris Baker
