SUPPLEMENTARY INFORMATION:

I. Background
The continuation coverage provisions of section 601 through 608 of ERISA (and parallel provisions of the Internal Revenue Code (Code)) generally require group health plans to offer qualified beneficiaries’ the opportunity to elect continuation coverage following certain events that would otherwise result in the loss of coverage. Continuation coverage is a temporary extension of the qualified beneficiary’s previous group health coverage. The right to elect continuation coverage allows individuals to maintain group health coverage under adverse circumstances and to bridge gaps in health coverage that otherwise could limit their access to health care.

COBRA provides the Secretary of Labor (the Secretary) with authority under section 608 of ERISA to carry out the continuation coverage provisions. The Conference Report that accompanied COBRA divided interpretive authority over the COBRA provisions between the Secretary and the Secretary of the Treasury (the Treasury) by providing that the Secretary has the authority to issue regulations implementing the notice and disclosure requirements of COBRA, while the Treasury is authorized to issue regulations defining the required continuation coverage.

On May 26, 2004, the Department of Labor (the Department) published in the Federal Register (69 FR 30084) final regulations governing the timing, content, and administration of the notice obligations arising under ERISA. These final rules implementing the notice requirements of the COBRA provisions of ERISA also apply for purposes of the parallel Code provisions.

This recordkeeping requirement constitutes an information collection within the meaning of the PRA, for which the Department has obtained approval from the Office of Management and Budget (OMB) under OMB Control No. 1210–0123. The OMB approval is currently scheduled to expire on July 31, 2007.

SUPPLEMENTARY INFORMATION:

I. Background

Title 30, CFR § 75.1716, 75.1716–1 and 75.1716–3 require operators of underground coal mines to notify MSHA of proposed mining under bodies of water and to obtain a permit to mine under a body of water if, in the judgment of the Secretary, it is sufficiently large to constitute a hazard to miners. This is a statutory provision contained in Section 317(r) of the Federal Mine Safety and Health Act of 1977. The regulation is necessary to prevent the inundation of underground coal mines with water, which has the potential of drowning miners. The coal mine operator submits an application for the permit to the District Manager in whose district the mine is located. Applications contain the name and address of the mine; projected mining and ground support plans; a mine map showing the location of the river, stream, lake or other body of water and its relation to the location of all working places; a profile map showing the type of strata and the distance in elevation between the coal bed and the water involved.
