signal to alert surface personnel of any problems underground. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

7. Marrowbone Development Company

Marrowbone Development Company, P.O. Box 119, Naugatuck, West Virginia 25685 has filed a petition to modify the application of 30 CFR 75.350 (air courses and belt haulage entries) to its North Marrowbone Creek Mine (I.D. No. 46–08680) located in Mingo County, West Virginia. The petitioner proposes to use an automatic fire detection system based on carbon monoxide monitoring of the underground conveyor entries to allow air coursed through conveyor belt entries to be used to ventilate active working places. The petitioner proposes to install a carbon monoxide detection system as an early warning fire detection system in all belt entries used to course intake air to a working place. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

8. Marrowbone Development Company
[Docket No. M–98–26–C]

Marrowbone Development Company, P.O. box 119, Naugatuck, West Virginia 25685 has filed a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment; maintenance) to its North Marrowbone Creek Mine (I.D. No. 46–08680) located in Mingo County, West Virginia. The petitioner proposes to use permanently installed spring-loaded locking devices instead of paddocks on battery plugs. The petitioner proposes to install and maintain spring-loaded locking devices on battery plugs to prevent the threaded rings that secures the battery plugs to the battery receptacles from loosening unintentionally. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

Eagle Energy, Inc., P.O. Box 368, Madison, West Virginia 25130 has filed a petition to modify the application of 30 CFR 75.1002 (location of trolley wires, trolley feeder wires, high-voltage cables, or transformers) to its Mine No. 1 (I.D. No. 46–07711) located in Boone County, West Virginia. The petitioner proposes to use 4,160 volt cables to power longwall equipment. The petitioner states that all personnel who perform maintenance on the longwall or miners who work in proximity of the high-voltage equipment would receive training in high-voltage safety and maintenance procedures before this proposed alternative method is implemented.
