General Comment

I currently participate in the 401k plan with Fidelity. I received the prospectus regarding the investment percentage fees.

But no such investment fees displayed on any of 401k statement. I called and asked and Fidelity refer me to the investment prospectus instead.

I would like to see the investment fees (or any fees related to my 401k) to display on my 401k statement to see how much fees I've paid for a certain time, or year-to-date fees.
