Project Title: New Service in Western Maine

Project Number	Temporary Project Number	Date Created	Start Date	End Date
ME-2019-002-01-01	1346-2019-1-P1	2/24/2020	6/9/2018	3/31/2021

Project Description

Amendment #1 - Adding funds for year 2 of service. All other descriptions are unchanged.

Scope of Work: The commuter route between Farmington and Lewiston~Auburn with a connection in Livermore to the Rumford/Mexico area is expected to run four (4) round trips daily on weekdays (M-F) with the exception of major holidays during peak times beginning in March 2019 with trial runs to begin prior to full service. WMTS expects to use two (2) 24+2 passenger vehicles to support this run. During the trial period WMTS will use accessible buses available in the existing fleet. This will be a fare based service with different fares by zones with multi-ride discounts passes available for purchase.

Other Information: Annual revenue hours for the Farmington to Lewiston~Auburn service is expected to be 3,379 hours and annual revenue miles is expected to be 92,664 miles. The connecting service to Rumford/Mexico is expected to be 1,365 revenue hours and 11, 492 revenue miles. After three (3) years of service the annual ridership is expected to be 20,375 persons on the Farmington to Lewiston~Auburn route with an additional 8,925 persons on the connector route to Rumford/Mexico from Livermore. The approximate cost per passenger trip is expected to be \$10.81 for the Farmington to Lewiston~Auburn run and \$9.97 per passenger trip for the route connecting Rumford/Mexico to Livermore.

Vehicle purchases information: Vehicles to support the commuter route would be an expansion to the existing WMTS fleet. The service would rely on two 24+2 accessible buses with digital signage, video/audio recording ability and the ability to support electronic data collection and annunciator programming and passenger WIFI capabilities.

Project Benefits

This expansion will create opportunities for expanded service to employment, higher education, and medical services in an area where general public transportation is very limited. Services that do exist are demand-responsive, so the need for commuter service was a high priority in the WMTS feasibility study. This allows persons living in the rural area access to services in the urban center that are unavailable in the smaller communities on a dependable regular schedule.

Additional Information

None provided.
