Comment	<p>The Oklahoma Department of Transportation (ODOT) must comply with all applicable Federal laws and regulations related to this project, including the ADA Standards for Transportation Facilities, based on the U.S. Access Board's ADA Accessibility Guidelines. Found here: <a href="http://www.access-board.gov/guidelines-and-standards/transportation/facilities/ada-standards-for-transportation-facilities">http://www.access-board.gov/guidelines-and-standards/transportation/facilities/ada-standards-for-transportation-facilities</a></p> <p>Specifically, ODOT must comply with the ADA Standards for Transportation Facilities when constructing the OSU Transit Operations/Maintenance Facility. The following is a non-exhaustive list of ADA standards that ODOT must comply with and document compliance of:</p>

- As required under DOT ADA Standard 206.4.1, ODOT must ensure that 60 percent of all public entrances to the facility will be accessible. If a station has only two entrances, then both must be accessible.
- As required under DOT ADA Standard 810.10, for rail projects, ODOT must ensure that no flange way gap can be greater than 2.5" where passenger circulation paths cross tracks at grade (i.e. a street-level pedestrian crossing over streetcar tracks).
- As required under DOT ADA Standard 206.3, ODOT must ensure that accessible routes coincide with or are located in the same area as general circulation paths, and elements such as ramps, elevators, and fare vending and collection areas are placed to minimize the distance that wheelchair users and other persons who cannot climb steps must travel in comparison to the general public.
- As required under DOT ADA Standard 406.8, ODOT must ensure that curb ramps will have detectable warnings.
- As required under DOT ADA Standard 810.2, ODOT must ensure that bus boarding and alighting areas are in compliance with the ADA-ABA Guidelines (Section 810.2), which address surfaces (sturdy); dimensions (96" long x 60" wide); connection to sidewalks, streets, and pedestrian paths; slope (not steeper than 1:48); signs; and public address systems.
- As required by DOT ADA Standard 810.5.3, ODOT must ensure that station platforms must be coordinated with the vehicle floor height.

The information provided above is intended as technical assistance and applies only to the project as described. Should the project scope change or new information on the project be provided, FTA may require a re-evaluation of the project information as it relates to ADA and require additional information. This confirmation is not an express or implied promise of project compliance with the ADA.

For DBE: Please recall 49 CFR Part 26.49(a) states 'If you are an FTA recipient, you must require in your DBE program that each transit vehicle manufacturer, as a condition of being authorized to bid or propose on FTA-assisted transit vehicle procurements, certify that it has complied with the requirements of this section.' FTA's current list of eligible TVMs can be found at <https://www.transit.dot.gov/regulations-and-guidance/civil-rights-ada/eligible-transit-vehicle-manufacturers>

Please recall 49 CFR Part 26.49(a)(4) states 'FTA recipients are required to submit within 30 days of making an award, the name of the successful bidder, and the total dollar value of the contract in the manner prescribed in the grant agreement.'
