

Attachment 3
Calculating the Veteran EER Weighted for Veterans Entering Employment Following Intensive Services for a Sample State
Data Elements for the Sample State Derived from the National VETS 200 C Report for Period Ending June 30, 2007 (PY 2006)

DATA ELEMENTS					
Row Number and Title	Column Number and Title		Short Title	Reported Value	Calculated Value
17 – Entered Employment Following Staff Assisted Services Numerator	C – Total Veterans and Eligible Persons	Veteran Numerator		1,025	--
18 – Entered Employment Following Staff Assisted Services Denominator	C – Total Veterans and Eligible Persons	Veteran Denominator		1,450	--
19 – Entered Employment Following Staff Assisted Services Rate	C – Total Veterans and Eligible Persons	Veteran EER		71%	--
20 – Entered Employment Following Intensive Services Numerator	C – Total Veterans and Eligible Persons	Veteran Receiving Intensive Services Numerator		210	--
CALCULATION STEPS					
Step 1: Identify the Veteran Numerator = 1,025					
Step 2: Calculate the Veteran Receiving Intensive Services Weighting Factor: (Veteran Receiving Intensive Services Numerator = 210) X (0.25) = Veteran Receiving Intensive Services Weighting Factor = 53*					
Step 3: Calculate the Weighted Veteran Numerator: (Veteran Numerator = 1,025) + (Veteran Receiving Intensive Services Weighting Factor = 53) = Weighted Veteran Numerator = 1,078					
Step 4: Calculate the Weighted Veteran EER: (Weighted Veteran Numerator = 1078) / (Veteran Denominator = 1,450) = Weighted Veteran EER = 74%*					

*rounded to the nearest whole number or percent
