Each week, this space will bring you [the best from our blog](#).

- [Hold the Flowers](#): 3 Mother's Day Messages that Matter: On Mother's Day, we buy flowers and cards to show how much we care. But there are other ways we can value our mothers. Here are three messages you probably won't find in any greeting cards but would mean a lot to working moms.
- [Living With Unpaid Leave](#): A Mom's Perspective: "My husband and I are just your average, middle-class recession survivors. We both work a nine-to-five job, on different shifts, and make enough to be comfortable. So something as natural as welcoming our first child shouldn't be daunting — but it is," writes Shawna Mascarelli, a working mom from Seattle.
- [Small Business Owners](#): Are You Helping Protect Your Employees' Financial Security? "If you are a small business providing retirement and health benefits to your employees, you play an important role in your employees' financial security," writes Phyllis Borzi, assistant secretary of labor for employee benefits security.

### A Leg Up for Former Inmates

In the current national dialogue on criminal justice and prison reform, creating employment opportunities are discussed as a meaningful way to

## What's New

### Helping Baltimore as the City Heals

In the wake of the recent civil unrest in Baltimore, U.S. Secretary of Labor Thomas E. Perez visited the city on May 6 and met with local officials, community leaders, students and other stakeholders to learn about their needs and concerns, and discuss how the federal government can help. After the Ferguson protests last August, the department worked with Missouri state and local officials to help residents there — especially youth and young adults — access job training opportunities with a \$5 million demonstration grant to the State of Missouri and North St. Louis. A similar project tailored to the specific needs identified by the department's partners at the city and state levels — is expected to aid Baltimore in its recovery. "Our goal is get these resources out in a matter of weeks, not a matter of months," Perez said. "At the same time, we want to make sure we take the time to listen. We want sustainable success."

"Our goal is get these resources out in a matter of weeks, not a matter of months," Perez said. "At the same time, we want to make sure we take the time to listen. We want sustainable success."

### 'Lead on Leave' Tour Heads to Oregon

Women's Bureau Director Latifa Lyles continued the "Lead on Leave" tour with a keynote speech at the State of Motherhood forum in Portland on May 1. Hosted by Family Forward Oregon and the Portland City Club, the event welcomed advocates to discuss family leave and related issues.

"When mothers succeed, America succeeds," Lyles said to the packed crowd. Two bills are currently before the Oregon legislature aimed at providing paid sick leave programs for families. Since it began on April 1, the "Lead on Leave" tour has featured Secretary Perez, White House senior advisor Valerie Jarrett, other federal, state and local officials, business leaders and small business owners at events across the country. The initiative highlights how state, localities and businesses are taking the lead on providing workers with paid leave. Currently, the U.S. is the only industrialized nation without some form of national paid leave.

## National News

2015 Fall Safety Stand-Down Is Up-and-Running

reduce recidivism and strengthen local communities. Federal attorneys from around

the nation gathered at Department of Justice headquarters in Washington, D.C., on May 8 to discuss how to help people successfully transition back into their communities after release from jail or prison. Secretary Perez met with the attorneys to review departmental policies and programs that already are improving the lives of once incarcerated individuals — including job training and career counseling services for adults and youth who have been in the criminal justice system. He urged participants to work in their communities to make these opportunities more accessible to more people. "Helping individuals coming through the criminal justice system land on their feet is both a moral and economic imperative," Perez said.

## Protecting Farmworkers

The nonprofit organization Farmworker Justice plays an important role in giving migrant and seasonal farmworkers a voice. At its annual

awards reception in Washington, D.C. on May 6, Secretary Perez accepted an honor for the department's efforts on behalf of farmworkers, and acknowledged that the workers contribute greatly to our lives while facing high rates of wage, health and safety violations. "We all depend on the work of farmworkers — they put food on our dinner tables. But far too often, they can't afford to put food on their own," said Perez. "They are among the most vulnerable workers in our economy. Their work is often dirty and dangerous, done in unsafe or unhealthy conditions." Last year the Wage and Hour Division recovered more than \$4.5 million in unpaid wages for more than 12,000 agricultural workers nationwide, while assessing employers \$3 million in penalties.

## Education: A Great Equalizer

Educators play a critical role in our efforts to transform the nation's workforce system, Secretary Perez told National Education Association board members at its headquarters in Washington, D.C., on May 1. As the department builds a modern "skills superhighway" that puts people on pathways to middle-class careers, educators are key in making sure schools are preparing students for the workforce. "Education is

Companies and workers in all 50 states joined the Occupational Safety and Health Administration on May 4 to launch the second annual National Fall Safety Stand-Down. Through May 15, construction industry employers and employees are encouraged to voluntarily stop work to learn and discuss how to prevent

deaths and catastrophic injuries. Industry, business leaders and others — including universities, labor organizations, and community and faith-based groups — have scheduled stand-downs nationwide. The U.S. Air Force is also joining the effort by hosting stand-down events at bases worldwide. One of the many events already held was led by students at Madison Park Technical-Vocational High School and YouthBuild Boston who have been safely building a low-income, affordable house there since September 2014. On May 5, they traded their tools for notepads and pencils during their own stand-down. Discussing the importance of fall safety, Assistant Secretary of Labor for Occupational Safety and Health Dr. David Michaels said: "People who fall are not just numbers — they are mothers, fathers, sisters and brothers. The cost of building our nation and economy cannot be the lives of its workforce, and that's what this Stand-Down is all about." In 2014, more than 5,000 employers and more than one million workers participated in the record-setting event. Organizers expect to set a new record for participation in 2015.

### New Protections Put in Place for Workers in Confined Spaces

The Occupational Safety and Health Administration published a final rule on May 4 to increase protections for construction workers in confined spaces. Manholes, crawl spaces, tanks and other confined spaces are difficult to exit in an emergency, and people working in confined spaces face life-threatening hazards such as exposure to toxic substances, electrocution, explosions and asphyxiation. Last year, two workers were asphyxiated while repairing leaks in a manhole, the second when he went down to save the first. "In the construction industry, entering confined spaces is often necessary, but fatalities like these don't have to happen," said Secretary Perez. "This new rule will significantly improve the safety of construction workers who enter confined spaces."

### Capitol Hill Stands Down for Fall Safety

Restoration work at the U.S. Capitol dome has been a prominent feature of the Washington, D.C., skyline for more than a year now. Inside an impressive 288-foot vault wrapped by a web of scaffolding, the dome's workers safely climb

a great equalizer," he said. "Educators are at the center of the skills infrastructure." Perez also told board members that the Obama administration remains steadfast in its commitment to protecting educators' right to bargain collectively, and to making sure they have a voice in the workplace.

## New Diversity Council Meets

The new Diversity and Inclusion in Government Council held its first-ever meeting on May 4. Opening remarks were made by Deputy Secretary of Labor Chris Lu, the council's co-chair and senior executive representative. "The establishment of this council can help us create and foster a federal workplace culture that values our employees' unique contributions and develops them to their full potential," said Lu. He was joined by the council's chair, Katherine Archuleta, director of the Office of Personnel Management. The council was created as a forum for improving senior leadership engagement and collaboration on strategic and operational diversity and inclusion priorities. Moving forward, it will develop guidance to cultivate a workplace culture of inclusion, collaboration, employee engagement, transparency, information-sharing, cognitive diversity and equity for all federal employees.

## Benefits of Safety Culture

Workplace injuries are costly for employers, workers and their families, Assistant Secretary of Labor for Occupational Safety and Health Dr. David Michaels reminded attendees at the Minnesota Safety and Health Conference in Minneapolis on May 5. He also discussed the importance of having a culture of workplace safety and how it prevents worker injuries and illnesses. Employers were encouraged to implement a safety and health management system. The system includes management leadership, worker participation, hazard identification and assessment, hazard prevention and control, education and training, and program evaluation and improvement.

## Pennsylvania Veterans Job Fair

More than two dozen employers with active job openings attended a veterans' job fair and apprenticeship information session on May 4, hoping to bring

in and out every day making repairs to cracks in the iconic structure. In the shadow of this historic project, the Occupational Safety and Health Administration joined Turner Construction in the Senate Park on May 6 for a fall safety stand-down event, part of the National Fall Safety Stand-Down taking place nationwide through May 15. Deputy Secretary of Labor Chris Lu delivered remarks alongside the company's representatives and safety experts. He reminded those responsible for the project's completion why fall prevention is so vital. "Your efforts will help preserve this national treasure and landmark of our democracy for many years to come. And as someone who worked in Congress for a dozen years, I feel a special connection to your work," said Lu. "This is a massive project that involves many challenges, including scaling great heights. But above all, we want to ensure that at the end of each day, every worker can go home safe." More than 300 construction workers die from falls or fall-related injuries each year, an average of about one worker per day.

## News You Can Use

### The Heat (App) Is On!

Heat illness sickens thousands of workers every year, and severe cases can be fatal. To help keep outdoor workers cool, the Occupational Safety and Health Administration developed a free app to calculate worksite heat index and risk levels, and educate users about how to respond to a heat emergency. More than 187,000 people have downloaded the app since its 2011 launch. In the app's first big

update on May 5, iPhone users discovered new features. With an attractive, easy-to-use interface, the new version is optimized for the latest iPhones. The app automatically provides the current conditions and maximum heat at your location and can accept manual input if users don't have cell service.

## Of Note

### The 'Oscars' of Government Service

What do the Mine Safety and Health Administration mine rescue team, an Employee Benefits Security Administration investigator, and the department's operations "Mr. Fix It" have in common? They were

veterans into their workforce. Assistant Secretary of Labor for Veterans' Employment and Training Keith Kelly joined Rep. Mike Fitzpatrick of Pennsylvania at the American Job Center in Bristol, Pa., for the event. Among those present to recruit veterans were small businesses based in Bucks County, large businesses like Home Depot and Loews and the Philadelphia Police Department. "This was a great opportunity to work with our congressional partners to bring attention to the services available to both employers and veterans," noted Kelly. "We look forward to working with other members of the Congressional Veterans Job Caucus to promote these vital and effective services, and I hope veterans around the country will go to their local AJC to get started finding a career today." Staff from the Employment and Training Administration's Office of Apprenticeship assisted employers learning how to build apprenticeship programs and taught veterans how to apply for existing apprenticeship programs.

## Not Defined by Disability

"My Disability Is One Part of Who I Am" is the theme of this year's National Disability Employment Awareness Month. The nationwide initiative annually raises awareness of employment issues faced by people with disabilities and celebrates their contributions to the workplace. While October is NDEAM, announcing the theme in May helps workplaces, individuals and communities begin planning activities. "This year's theme encapsulates the important message that people with disabilities are just that — people," said Jennifer Sheehy, acting assistant secretary of labor for disability employment policy.

## Older Women Mean Business

Approximately 80 people gathered at the National Press Club in Washington D.C. on May 6 for "Our Women Mean Business: Encore Careers After 40." Women's Bureau Director Latifa Lyles delivered remarks detailing the department's efforts to

help meet the economic needs of women workers. "We must develop and deliver programs that work

all named as finalists in the prestigious Samuel J. Heymen Service to America Medals,

more commonly known as the "Sammies." The award is presented each year by the Washington, D.C.-based nonprofit Partnership for Public Service to celebrate the accomplishments of a dynamic and innovative federal workforce that meets the needs of the American people. Thirty finalists were announced recently and invited to participate in events to highlight their service, including joining Katherine Archuleta, director of the Office of Personnel Management, on the field at Washington Nationals Park on May 4 as she threw out the first pitch. The winners of the 2015 award will be announced in October. Kevin Stricklin, MSHA administrator for coal mine safety and health, along with Virgil Brown, Jeffery Kravitz and John Urosek, are finalists in the Citizens Service category. Stricklin and his team have played pivotal roles in mine rescue and recovery efforts, crafting innovations that have saved countless lives. Anna Dozier, senior investigator at EBSA, is a finalist in the Homeland Security and Law Enforcement category. Dozier has spearheaded major investigations involving the mismanagement of retirement, health and welfare plans, and has protected and recovered millions of dollars for American workers. Edward Hugler, the department's deputy assistant secretary for operations, is a finalist in the Management Excellence category. Known for his skill in addressing management challenges, Hugler has helped oversee major departmental initiatives, including the recent transition of the financial management system.

## DOL Working for You

Missouri Manufacturer Learns It 'Pays to Be Safe'

Several years ago, Joyce Couch read about the Occupational Safety and Health Administration's On-Site Consultation Program, and saw an opportunity to help her co-workers at Husky, a Missouri company that manufactures gas nozzles and pump hardware. As a human resources manager for the Pacific-based company, Couch recognizes safety's importance in the workplace and using available resources to educate and train employees. With that in mind, she helped Husky pursue OSHA's Safety and Health

Achievement Recognition Program. SHARP is open to small businesses that are willing and able to meet requirements to ensure a safe workplace. Those that do are recognized for their exemplary safety and health management systems. Safety and health consultants visit often, giving safety talks and helping train employees on using new equipment. "Businesses sometimes get nervous when they hear the term 'OSHA,' but this is a true partnership with skilled professionals who can share safety and health information with our workers," Couch explained. "We are very excited about earning the SHARP designation. It is a sense of pride for our employees to know that they have an exceptional safety and health record. It also makes good business sense because our worker compensation

for women across their lifespans," she said. "As more and more women re-enter the workforce after taking time off for caregiving or embark on their second and third careers, their success is critical for today's working families."

---

## Immigrant Working Women Heard

To hear and address issues faced by California's immigrant working women, Regional Administrator Kelly Jenkins-Pultz and

Regional Secretary Representative Elmy Bermejo traveled from the Women's Bureau office in San Francisco to Fresno for a roundtable on May 4. They listened as 20 advocates, immigrant women workers and federal agencies representing rural communities discussed affordable child care, reliable transportation, job training opportunities and access to federal grants.

---

## Women Building the Nation

The largest gathering of tradeswomen in the world — 1,200 from more than 25 states — convened at the "Women Building the Nation" Fifth National Conference in Los Angeles on May 2. Women's Bureau Director Latifa Lyles was invited to speak by its sponsor, the State Building and Construction Trades Council in Sacramento. In her remarks, she stressed the critical need women have for more opportunities in the trades. These opportunities provide a strategy to lift women out of poverty and help close the gender wage gap, noted Lyles, who also led a roundtable discussion for apprentices, journeyman, elected union leaders and apprenticeship coordinators to discuss the challenges and rewards of good jobs and sustainable careers.

## DOL in Action

\$7.5M to Help Kentucky Residents Hurt by Reduced Demand for Coal

In recent years, changes in how the U.S. sources its energy have reduced the demand for coal. As a result, mining communities have seen an increased number of layoffs by businesses that depend on the money spent by coal miners and their families. To help hard-hit coal-mining communities in eastern Kentucky, the department announced a \$7.5 million National Emergency Grant on May 7. Funds will provide job training and employment services to prepare affected workers for careers in the region's high-growth industries. Awarded to the Eastern Kentucky Concentrated Employment Program, Inc., the region's workforce development organization, the grant will serve approximately 685 individuals. "For so many places in Kentucky, coal mining hasn't just been the economic lifeblood, but also the fabric that defines and unites the community," said Secretary Perez. "The grants we're awarding today will help workers affected by these changes identify new opportunities, land new jobs and build a brighter future."

Personal Safety Gear May Have Prevented Roofer's Death

A 30-year-old roofer's life was tragically cut short in November 2014 after a fall caused severe head trauma. The man was found unresponsive below a 32-foot extension ladder he used to renovate a roof at a two-story building at Missouri's Whiteman Air Force Base. Occupational Safety and Health Administration investigators found the victim's employer, Midwest Roofing, did not provide required fall prevention equipment. OSHA inspectors cited the company for six serious safety violations, and Infinite Energy Construction, the general contractor, for four serious safety violations related to OSHA fall standards. "Companies that put their workers dangerously high above the ground are responsible for protecting them," said Barbara Theriot, OSHA's area director in Kansas City, Mo.
