

**DEPARTMENT OF LABOR****Office of the Secretary****20 CFR Chs. I, IV, V, VI, VII, and IX****29 CFR Subtitle A and Chs. II, IV, V, XVII, and XXV****30 CFR Ch. I****41 CFR Ch. 60****48 CFR Ch. 29****Semiannual Agenda of Regulations**

**AGENCY:** Office of the Secretary, Labor.

**ACTION:** Semiannual regulatory agenda.

**SUMMARY:** This document sets forth the Department's semiannual agenda of regulations that have been selected for review or development during the coming year. The Department's agencies have carefully assessed their available resources and what they can accomplish in the next 12 months and have adjusted their agendas accordingly.

The agenda complies with the requirements of both Executive Order 12866 and the Regulatory Flexibility Act. The agenda lists all regulations that are expected to be under review or development between April 2009 and April 2010, as well as those completed during the past 6 months.

**FOR FURTHER INFORMATION CONTACT:** Kathleen Franks, Director, Office of Regulatory Policy, Office of the Assistant Secretary for Policy, U.S. Department of Labor, 200 Constitution Avenue NW., Room S-2312, Washington, DC 20210; (202) 693-5959.

**Note:** Information pertaining to a specific regulation can be obtained from the agency contact listed for that particular regulation.

**SUPPLEMENTARY INFORMATION:** Executive Order 12866 and the Regulatory Flexibility Act require the semiannual publication in the **Federal Register** of an agenda of regulations. As permitted by law, the Department of Labor is combining the publication of its agendas under the Regulatory Flexibility Act and Executive Order 12866.

Executive Order 12866 became effective September 30, 1993, and, in substance, requires the Department of Labor to publish an agenda listing all the regulations it expects to have under active consideration for promulgation, proposal, or review during the coming 1-year period. The focus of all departmental regulatory activity will be on the development of effective rules that advance the Department's goals and that are understandable and usable to the employers and employees in all affected workplaces.

In addition, beginning with the fall 2007 edition, the Internet will be the basic means for disseminating the Unified Agenda. The complete Unified Agenda will be available online at [www.reginfo.gov](http://www.reginfo.gov), in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

The Regulatory Flexibility Act, which became effective on January 1, 1981, requires the Department of Labor to publish an agenda, listing all the regulations it expects to propose or promulgate that are likely to have a "significant economic impact on a substantial number of small entities" (5 U.S.C. 602).

The Regulatory Flexibility Act (under section 610) also requires agencies to periodically review rules "which have or will have a significant economic impact upon a substantial number of small entities" and to

annually publish a list of the rules that will be reviewed during the succeeding 12 months. The purpose of the review is to determine whether the rule should be continued without change, amended, or rescinded.

The next 12-month review list for the Department of Labor is provided below, and public comment is invited on the listing. A brief description of each rule, the legal basis for the rule, and the agency contact are provided with each agenda item.

### **Occupational Safety and Health Administration**

Methylene Chloride (RIN 1218-AC23)  
Bloodborne Pathogens (RIN 1218-AC34)

### **Employee Benefits Security Administration**

Plan Assets-Participant Contributions Regulations (RIN 1210-AB11)

All interested members of the public are invited and encouraged to let departmental officials know how our regulatory efforts can be improved, and, of course, to participate in and comment on the review or development of the regulations listed on the agenda.

For this edition of the Department of Labor's regulatory agenda, the most important significant regulatory actions and a Statement of Regulatory Priorities are included in The Regulatory Plan, which appears in both the online Unified Agenda and in part II of the **Federal Register** that includes the Unified Agenda.

**NAME: Hilda Solis**  
*Secretary of Labor.*

## The 93 Regulatory Agendas

## Employment and Training Administration - Proposed Rule

Title	Regulation Identifier Number

Title: YouthBuild Program

Abstract: The YouthBuild Transfer Act of 2006, Public Law 109-281, enacted on September 22, 2006, transfers oversight and administration of the YouthBuild program from the U.S. Department of Housing and Urban Development (HUD) to the U.S. Department of Labor (DOL). The YouthBuild program model targets are high school dropouts, adjudicated youth, youth aging out of foster care, and other at-risk youth populations. The program model balances in-school learning, geared toward a high school diploma or GED, and construction skills training, geared toward a career placement for the youth. DOL intends to develop regulations in response to the legislation and to guide the program implementation and management.

Title: Federal-State Unemployment Compensation Program; Funding Goals for Interest-Free Advances

Abstract: Under title XII of the Social Security Act (42 U.S.C. 1321 et seq.), States may, when needed, obtain repayable advances from the Federal unemployment account in the Unemployment Trust Fund to pay State unemployment compensation benefits. States may be exempted from the requirement to pay interest on these advances under certain conditions, including the condition that the "State meets funding goals" established by the Secretary of Labor in regulations. The regulation would establish these funding goals.

Title: Trade Adjustment Assistance Program; Apportionment of Training Funds to States

Abstract: The Trade and Globalization Assistance Act of 2009 (Act), which was included in title VIII subtitle I of the American Recovery and Reinvestment Act of 2009, reforms and reauthorizes the Trade Adjustment (TAA) for Workers program. The Act modifies section 236(a)(2) of the Trade Act of 1974 (19 U.S.C. 2296) setting new guidelines and criteria for distributing funds to the states for the purpose of training TAA-certified workers, and adds section 236(g) requiring that the Secretary issue regulations to implement the new funding procedures within not later than one year of enactment.

Title: Trade Adjustment Assistance for Workers Program; Regulations

Abstract: The Trade and Globalization Assistance Act of 2009 (Act), which was included in title VIII, subtitle I of the American Recovery and Reinvestment Act of 2009, reforms and reauthorizes the Trade Adjustment Assistance for Workers program.

More specifically, the law sets forth new guidelines for the Department of Labor and/or the States to investigate petitions for benefits; provide benefits and services to certified workers; and report on the program's effectiveness. The Act modifies section 248 of the Trade Act of 1974 (19 U.S.C. 2320) and requires that the Secretary issue regulations to carry out these provisions.

Title: Senior Community Service Employment Program; Performance Accountability

Abstract: The Older Americans Act Amendments of 2006, Pub. L. 109-365, enacted on October 17, 2006, contains provisions amending title V of that Act, which authorizes the Senior Community Service Employment Program (SCSEP). The Amendments, effective July 1, 2007, make substantial changes to the current SCSEP provisions in the Older Americans Act relating to performance accountability. Section 513(2) of title V requires that the Agency establish and implement new measures of performance by July 1, 2007. Section 513(b)(3) requires that the Secretary issue definitions of indicators of performance through regulation after consultation with stakeholders. Therefore, this Interim Final Rule (IFR) is intended to implement changes to the SCSEP program performance accountability regulations found at 20 CFR 641 in subpart G. Changes to other subparts of part 641 will be implemented through a separate Notice of Proposed Rulemaking.

Other	Statutory	Interim Final Rule	06/30/2007

Regulatory Plan:

Statement of Need: The 2006 Amendments to the Older Americans Act (OAA-2006) were enacted on October 17, 2006. The Amendments instituted a number of significant changes to the SCSEP, including time limits on the participation of eligible individuals, new enrollment priorities, streamlined and strengthened performance measures, more training options for participants, new limits on participant benefits, and required open competition of national grants every four years. The Department was required to implement the new performance measures by July 1, 2007, and published an Interim Final Rule on these requirements in the Federal Register on June 29, 2007 (72 FR 35832). However, SCSEP grantees were advised that they were responsible for complying with all the OAA-2006 changes as of July 1, 2007, as communicated in administrative guidance issued on June 11, 2007. Since OAA-2006 instituted so many significant changes in addition to those relating to performance accountability, it is important that regulations implementing the full requirements of the Amendments be issued consistent with the identified timetable.

Legal Basis: These regulations are authorized by 42 U.S.C. 3056 et seq. to implement amendments to title V of the Older Americans Act of 1965.

Alternatives: The public was afforded an opportunity to provide comments on the SCSEP performance measurement system changes when the Department published the IFR in the Federal Register. Comments on the IFR and a proposed rule for the SCSEP (RIN 1205-AB48) will be incorporated into one final rule.

Costs and Benefits: Preliminary estimates of the anticipated costs of this regulatory action have not been determined at this time and will be determined at a later date.

Risks: This action does not affect public health, safety, or the environment.

Title: Senior Community Service Employment Program

Abstract: The Older Americans Act Amendments of 2006, Pub. L. 109-365, enacted on October 17, 2006, contain provisions amending title V of that Act, which authorizes the Senior Community Service Employment program (SCSEP). The Amendments, effective July 1, 2007, made substantial changes to the SCSEP provisions in the Older Americans Act, including new requirements relating to performance accountability, income eligibility for program participation, competition of national grants, and services to participants. This NPRM consists of 8 subparts: subpart A--Purpose and Definitions; subpart B--Coordination with the Workforce Investment Act; subpart C--the State Plan; subpart D--Grant Application and Responsibility Review Requirements for State and National Grants; subpart E--Services to Participants; subpart F--Pilots, Demonstration, and Evaluation Projects, subpart H--Administrative Requirements; and subpart I--Grievance Procedures and Appeals Process. The performance accountability requirements (subpart G) were implemented through a separate Interim Final Rule (IFR).

Regulatory Plan:

Statement of Need: The 2006 Amendments to the Older Americans Act (OAA-2006) were enacted on October 17, 2006. The amendment instituted a number of significant changes to the SCSEP, including time limits on the participation of eligible individuals, new enrollment priorities, streamlined and strengthened performance measures, more training options for participants, new limits on participant fringe benefits, and required open competition of national grants every 4 years. The Department was required to implement the new performance measures by July 1, 2007, and published an IFR on these requirements in the Federal Register on June 29, 2007 (72 FR 35832). However, SCSEP grantees were advised that they were responsible for complying with all the OAA-2006 changes as of July 1, 2007, as communicated in administrative guidance issued on June 11, 2007. Since OAA-2006 instituted so many significant changes in addition to those relating to performance accountability, it is important that regulations implementing the full requirements of the Amendments be issued consistent with the identified timetable.

Legal Basis: These regulations are authorized by 42 U.S.C. 3056 et seq. to implement amendments to title V of the Older Americans Act of 1965.

Alternatives: The public will be afforded an opportunity to provide comments on the SCSEP program changes when the Department publishes the NPRM in the Federal Register. A Final Rule will be issued after analysis and incorporation of public comments to the NPRM and IFR (1205-AB47).

Costs and Benefits: Preliminary estimates of the anticipated costs of this regulatory action have not been determined at this time and will be determined at a later date.

Risks: This action does not affect public health, safety, or the environment.

Title: Attestations by Facilities Temporarily Employing H-1C Nonimmigrant Aliens as Registered Nurses

Abstract: This Final Rule reflects the extension of the H-1C visa program, which was extended by the Nursing Relief for Disadvantaged Areas Reauthorization Act of 2005 (NRDARA), Public Law 109-423, 120 Stat. 2900 (2006). In 2000, the Nursing Relief for Disadvantaged Areas Act of 1999 (NRDAA), Public Law 106-95, 113 Stat. 1312 (1999), amended the Immigration and Nationality Act to create a temporary visa program for nonimmigrant aliens to work as registered nurses for up to 3 years in facilities serving health professional shortage areas, subject to certain conditions. The NRDAA specified that the H-1C visas were available only during the 4-year period beginning on the date that interim or final regulations were promulgated. Under this Act, the Department published an interim rule, on August 22, 2000 (65 FR 51137), which was open for public comment through September 21, 2000. Before the NRDARA was enacted on December 20, 2006, the Department determined on April 24, 2006, that continued rulemaking was neither necessary nor appropriate at that time, because health care facilities could not sponsor new H-1C visas and no new H-1C visa could be issued. Therefore, the Department discontinued this rulemaking (71 FR 22912). However, given the new statutory authorization for the program, the Department has determined that it is appropriate to finalize the rule. Section 3 of Public Law 109-423 has exempted this rulemaking from the Administrative Procedure Act, so additional notice and comment are unnecessary.

Title: Modernizing the Labor Certification Process and Enforcement for Temporary Agricultural Employment of H-2A Aliens in the United States

Abstract: The Department of Labor proposes to suspend for nine months the H-2A regulations published on December 18, 2008, which became effective on January 17, 2009, that amended the rules governing the certification for temporary employment of nonimmigrant workers in agricultural occupations on a temporary or seasonal basis, and the enforcement of contractual obligations applicable to employers of such nonimmigrant workers. A suspension would provide the Department with an opportunity to review and reconsider the new requirements in light of issues that have arisen since the publication of the H-2A Final Rule, while minimizing the disruption to the Department, State Workforce Agencies, employers, and workers. To avoid the regulatory vacuum that would result from a suspension, DOL proposes to reinstate on an interim basis the rules that were in place on January 16, 2009, the day before the revised rules became effective.

Title: Periodic Pension Benefit Statements

Abstract: Section 508 of the Pension Protection Act of 2006 (PPA) amended section 105 of ERISA to require plans that are subject to ERISA to automatically provide participants and certain beneficiaries with individual pension benefit statements.

Generally, defined benefit plans must provide the statement every 3 years, with an annual alternative. Individual account plans that permit participant direction must provide the statement quarterly and individual account plans that do not permit participant direction must provide the statement annually. The PPA directed the Department of Labor to provide a model statement within 1 year of enactment of the statute and the Department has been given interim final rulemaking authority.

Title: Amendment of Regulation Relating to Definition of Plan Assets--Participant Contributions

Abstract: This rulemaking will amend the regulation that defines when participant moneys paid to or withheld by an employer for contribution to an employee benefit plan constitute "plan assets" for purposes of title I of ERISA and the related prohibited transaction provisions of the Internal Revenue Code. The regulation contains an amendment to the current regulation that will establish a safe harbor period of a specified number of business days during which certain moneys that a participant pays to, or has withheld by, an employer for contribution to a plan would not constitute "plan assets."

Title: Fiduciary Requirements for Disclosure in Participant-Directed Individual Account Plans

Abstract: This rulemaking will ensure that the participants and beneficiaries in participant-directed individual account plans are provided the information they need, including information about fees and expenses, to make informed investment decisions. The rulemaking may include amendments to the regulation governing ERISA section 404(c) plans (29 CFR 2550.404c-1). The rulemaking is needed to clarify and improve the information currently required to be furnished to participants and beneficiaries.

Priority: Economically Significant

Agenda Stage of Rulemaking: Long-term Action

Major: Yes

Unfunded Mandates: No

CFR Citation: 29 CFR 2550 (To search for a specific CFR, visit the [Code of Federal Regulations](#).)

Legal Authority: 29 USC 1104; 29 USC 1135

Legal Deadline: None

Regulatory Plan:

Statement of Need: Given the potentially significant impact fees and expenses can have on retirement savings, understanding what and how fees and expenses are charged to 401(k) plans is essential to plan participants and beneficiaries in making informed investment decisions.

Legal Basis: Section 505 of ERISA provides that the Secretary may prescribe such regulations as she considers necessary and appropriate to carry out the provisions of title I of the Act, including section 404 of ERISA.

Alternatives: Alternatives will be considered following a determination of the scope and nature of the regulatory guidance needed by the public.

Costs and Benefits: Preliminary estimates of the anticipated costs and benefits will be developed, as appropriate, following a determination regarding the alternatives to be considered.

Title: Amendment of Standards Applicable to General Statutory Exemption for Services

Abstract: This rulemaking will amend the regulation setting forth the standards applicable to the exemption under ERISA section 408(b)(2) for contracting or making reasonable arrangements with a party in interest for office space or services (29 CFR 2550.408b-2). This amendment will ensure that plan fiduciaries are provided or have access to that information necessary to a determination of whether an arrangement for services is "reasonable" within the meaning of the statutory exemption.

Title: Prohibited Transaction Exemption for Provision of Investment Advice to Participants in Individual Account Plans  
 Abstract: Section 601 of the Pension Protection Act (Pub. L. 109-280) amended ERISA by adding new sections 408(b)(14) and 408(g). Section 408(b)(14) is a prohibited transaction exemption that permits the provision of investment advice to participants or beneficiaries of certain individual account plans if the investment advice is provided under an "eligible investment advice arrangement," as defined in section 408(g). In order to qualify as an "eligible investment advice arrangement," the arrangement must either provide that any fees received by the adviser do not vary depending on the basis of any investment options selected, or use a computer model under an investment advice program that meets the criteria set forth in section 408(g) in connection with the provision of investment advice. Further, with respect to both types of advice arrangements, the investment adviser must disclose to advice recipients all fees that the adviser or any affiliate is to receive in connection with the advice. Section 408(g) requires that the computer model which serves as the basis for an eligible investment advice arrangement be certified by an "eligible investment expert" in accordance with rules prescribed by the Secretary of Labor. Section 408(g) also directs the Secretary of Labor to issue a model form for the required disclosure of fees. EBSA published a Request for Information that invited interested persons to submit written comments and suggestions concerning the expertise and procedures that may be needed to certify that a computer model meets the statutory criteria, and the content, types, and designs of fee disclosure materials currently used and their usefulness to plan participants.

Priority: Economically Significant

Legal Deadline: None

## Regulatory Plan:

Statement of Need: This rulemaking is necessary to fully implement the new exemption under section 408(b)(14) of ERISA pursuant to section 601 of the PPA.

Legal Basis: Section 505 of ERISA provides that the Secretary may prescribe such regulations as she finds necessary and appropriate to carry out the provisions of title I of the Act. In addition, section 408(g)(3) of ERISA provides the Secretary with authority to establish rules governing the computer model certification process.

Alternatives: Alternatives will be considered following a determination of the scope and nature of the regulatory guidance needed by the public.

Costs and Benefits: Preliminary estimates of the anticipated costs and benefits will be developed, as appropriate, following a determination regarding the alternatives to be considered.

Title: Model Notice of Critical Status for Multiemployer Plans

Abstract: The Pension Protection Act of 2006, Public Law 109-280 (PPA), signed into law August 17, 2006, required the Secretary of the Department of Labor to prescribe a model notice that multiemployer plans in critical status may use of satisfy their obligation to notify effected parties. The Secretary of Labor's obligation to prescribe a model was transferred to the Secretary of Treasury pursuant to the Worker, Retiree, and Employer Recovery Act of 2008, Pub. L. 110-458 (WRERA), signed into law December 23, 2008. Accordingly, the Department is withdrawing this initiative from the Semiannual Regulatory Agenda.

Title: Nondisplacement of Qualified Workers Under Service Contracts

Abstract: Executive Order 13495 of January 30, 2009, Nondisplacement of Qualified Workers Under Service Contracts, establishes the policy that Federal service contracts generally include a clause requiring the contractor and its subcontractors, under a contract that succeeds a contract for the same or similar service at the same location, to offer qualified employees (except managerial and supervisory personnel) employed on the predecessor contract a right of first refusal to employment under the successor contract. The order assigns enforcement responsibility to the Secretary of Labor and directs the Secretary, in consultation with the Federal Acquisition Regulatory Council, to issue regulations, within 180 days of the order to the extent permitted by law, to implement the order.

Title: Defense Base Act Waivers

Abstract: The Defense Base Act (DBA), 42 U.S.C. section 1651 et seq., provides workers' compensation benefits for civilian employees of U.S. Government contractors injured or killed while working overseas. The DBA authorizes the Secretary of Labor to waive application of the DBA in any contract, subcontract, location, or class of employees upon the recommendation of the head of any department or agency of the U.S. Government. 42 U.S.C. section 1651(e). Over the years, DOL has granted a variety of waivers without any published rules. This proposed regulation would clarify the procedures for agencies to request waivers, including who may request a waiver, the format of a waiver request, and the supporting information required. The regulation would also explain DOL's procedures for reviewing and granting a waiver, including the factors DOL considers in granting a waiver and the conditions and limitations of any waiver granted.

Title: Notice; Proposal to Rescind the Form T-1; Require Subsidiary Organization Reporting; Revise Interpretation Regarding LMRDA Coverage of Public Sector Intermediate Unions

Abstract: On October 2, 2008, the Department published a final rule establishing a Form T-1, Trust Annual Report, which certain labor organizations must file to disclose financial information regarding trusts in which they are interested pursuant to the Labor-Management Reporting and Disclosure Act (LMRDA). This rulemaking would propose to rescind the Form T-1. It would instead propose that filers of Forms LM-2 and LM-3, Labor Organization Annual Reports, report on their wholly owned, wholly controlled and wholly financed ("subsidiary") organizations on their Form LM-2 or Form LM-3 reports. Additionally, the rulemaking would propose to change an interpretation of the LMRDA regarding intermediate bodies. The proposed revised interpretation would state that intermediate bodies are covered only if they are themselves composed, in whole or part, of private sector affiliates.

Title: Amendments to the Fair Labor Standards Act

Abstract: Small Business Job Protection Act of 1996 (H.R. 3448) enacted on August 20, 1996 (Pub. L. 104-188, title II) amended the Portal-to-Portal Act (PA) and the Fair Labor Standards Act (FLSA). The U.S. Troop Readiness, Veteran's Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (Pub. L. 110-28) also amended the FLSA by increasing the minimum wage in three steps: to \$5.85 per hour effective July 24, 2007; to \$6.55 per hour effective July 24, 2008; and to \$7.25 per hour effective July 24, 2009. Changes will be required in the regulations to reflect these amendments. Other updates will address needed clarifications to additional sections of the regulations, including sections affected by Public Law 106-151, section 1 (December 9, 1999), 113 stat. 1731, and Public Law 106-202 (May 18, 2000), 114 Stat. 308.

Title: Child Labor Regulations, Orders, and Statements of Interpretation

Abstract: The Department of Labor continues to review the Fair Labor Standards Act child labor provisions to ensure that the implementing regulations provide job opportunities for working youth that are healthy and safe and not detrimental to their education, as required by the statute (29 U.S.C. sections 203(l), 212(c), 213(c), and 216(e)). This proposed rule will update the regulations to reflect statutory amendments enacted in 2004, and will propose, among other updates, revisions to address several recommendations of the National Institute for Occupational Safety and Health (NIOSH) in its 2002 report to the Department of Labor on the child labor Hazardous Occupations Orders (HOs) (available at <http://www.youthrules.dol.gov/resources.htm>).

Title: Labor Organization Annual Financial Reports

Abstract: The Department of Labor's Employment Standards Administration published a final rule on January 21, 2009, which modified the annual financial disclosure report Form LM-2 and established standards and procedures by which the Office of Labor Management Standards, pursuant to section 208 of the Labor Management Reporting and Disclosure Act (LMRDA), 29 U.S.C. 438, may revoke the authorization of a labor organization to file a simplified annual financial disclosure report, Form LM-3, and instead require it to file the more detailed Form LM-2. Through notice and comment rulemaking the Department extended the effective date of the January 21, 2009 Final Rule to April 21, 2009. The effective date and applicability date of the January 21, 2009 Final Rule were further extended through notice and comment rulemaking to October 19, 2009 and January 1, 2010, respectively. The Department has proposed withdrawing the January 21, 2009 Final Rule.

Title: Death Gratuity Authorized for Federal Employees

Abstract: The National Defense Authorization Act for FY 2008, which was signed in to law on January 28, 2008, resulted in the creation of a new section of the Federal Employees' Compensation Act. This section establishes a death gratuity payment of up to \$100,000 for federal employees who die of injuries incurred in connection with the employee's service with an armed force in a contingency operation. This bill also contains a provision for retroactivity for employees who died on or after October 7, 2001.

Title: Occupational Exposure to Crystalline Silica

Abstract: Crystalline silica is a significant component of the earth's crust, and many workers in a wide range of industries are exposed to it, usually in the form of respirable quartz or, less frequently, cristobalite. Chronic silicosis is a uniquely occupational disease resulting from exposure of employees over long periods of time (10 years or more). Exposure to high levels of respirable crystalline silica causes acute or accelerated forms of silicosis that are ultimately fatal. The current OSHA permissible exposure limit (PEL) for general industry is based on a formula recommended by the American Conference of Governmental Industrial Hygienists (ACGIH) in 1971 (PEL=10mg/cubic meter/(% silica + 2), as respirable dust). The current PEL for construction and maritime (derived from ACGIH's 1962 Threshold Limit Value) is based on particle counting technology, which is considered obsolete. NIOSH and ACGIH recommend 50µg/m3 and 25µg/m3 exposure limits, respectively, for respirable crystalline silica. Both industry and worker groups have recognized that a comprehensive standard for crystalline silica is needed to provide for exposure monitoring, medical surveillance, and worker training. The American Society for Testing and Materials (ASTM) has published a recommended standard for addressing the hazards of crystalline silica. The Building Construction Trades Department of the AFL-CIO has also developed a recommended comprehensive program standard. These standards include provisions for methods of compliance, exposure monitoring, training, and medical surveillance.

#### Regulatory Plan:

Statement of Need: Over 2 million workers are exposed to crystalline silica dust in general industry, construction, and maritime industries. Industries that could be particularly affected by a standard for crystalline silica include: Foundries, industries that have abrasive blasting operations, paint manufacture, glass and concrete product manufacture, brick making, china and pottery manufacture, manufacture of plumbing fixtures, and many construction activities including highway repair, masonry, concrete work, rock drilling, and tuckpointing. The seriousness of the health hazards associated with silica exposure is demonstrated by the fatalities and disabling illnesses that continue to occur; between 1990 and 1996, 200 to 300 deaths per year are known to have occurred where silicosis was identified on death certificates as an underlying or contributing cause of death. It is likely that many more cases have occurred where silicosis went undetected. In addition, the International Agency for Research on Cancer (IARC) has designated crystalline silica as a known human carcinogen. Exposure to crystalline silica has also been associated with an increased risk of developing tuberculosis and other nonmalignant respiratory diseases, as well as renal and autoimmune respiratory diseases. Exposure studies and OSHA enforcement data indicate that some workers continue to be exposed to levels of crystalline silica far in excess of current exposure limits. Congress has included compensation of silicosis victims on Federal nuclear testing sites in the Energy Employees' Occupational Illness Compensation Program Act of 2000. There is a particular need for the Agency to modernize its exposure limits for construction and maritime workers, and to address some specific issues that will need to be resolved to propose a comprehensive standard.

Legal Basis: The legal basis for the proposed rule is a preliminary determination that workers are exposed to a significant risk of silicosis and other serious disease and that rulemaking is needed to substantially reduce the risk. In addition, the proposed rule will recognize that the PELs for construction and maritime are outdated and need to be revised to reflect current sampling and analytical technologies.

Alternatives: Over the past several years, the Agency has attempted to address this problem through a variety of non-regulatory approaches, including initiation of a Special Emphasis Program on silica in October 1997, sponsorship with NIOSH and MSHA of the National Conference to Eliminate Silicosis, and dissemination of guidance information on its Web site. The Agency is currently evaluating several options for the scope of the rulemaking.

Costs and Benefits: The scope of the proposed rulemaking and estimates of the costs and benefits are still under development.

Risks: A detailed risk analysis is under way.

Title: Occupational Exposure to Beryllium

Abstract: In 1999 and 2001, OSHA was petitioned to issue an emergency temporary standard by the Paper Allied-Industrial, Chemical, and Energy Workers Union, Public Citizen Health Research Group, and others. The Agency denied the petitions but stated its intent to begin data gathering to collect needed information on beryllium's toxicity, risks, and patterns of usage. On November 26, 2002, OSHA published a Request for Information (RFI) (67 FR 70707) to solicit information pertinent to occupational exposure to beryllium including: Current exposures to beryllium; the relationship between exposure to beryllium and the development of adverse health effects; exposure assessment and monitoring methods; exposure control methods; and medical surveillance. In addition, the Agency conducted field surveys of selected work sites to assess current exposures and control methods being used to reduce employee exposures to beryllium. OSHA convened a Small Business Advocacy Review Panel under the Small Business Regulatory Enforcement Fairness Act (SBREFA) and completed the SBREFA Report in January 2008.

Title: Occupational Exposure to Diacetyl and Food Flavorings Containing Diacetyl

Abstract: On July 26, 2006, the United Food and Commercial Workers International Union (UFCW) and the International Brotherhood of Teamsters (IBT) petitioned DOL for an Emergency Temporary Standard (ETS) for all employees exposed to diacetyl, a major component in artificial butter flavoring. Diacetyl and a number of other volatile organic compounds are used to manufacture artificial butter food flavorings. These food flavorings are used by various food manufacturers in a multitude of food products including microwave popcorn, certain bakery goods, and some snack foods. OSHA denied the petition on September 25, 2007, but has initiated 6(b) rulemaking. Evidence from NIOSH and other sources indicated that employee exposure to diacetyl and food flavorings containing diacetyl is associated with bronchiolitis obliterans, a debilitating and potentially fatal disease of the small airways in the lung. Severe obstructive airway disease has been observed in the microwave popcorn industry and in food flavoring manufacturing plants. Experimental evidence has shown that inhalation exposure to artificial butter

flavoring vapors and diacetyl damaged tissue lining, the nose, and airways of rats and mice. OSHA published an Advanced Notice of Proposed Rulemaking (ANPRM) on January 21, 2009, but withdrew the ANPRM on March 17, 2009, in order to facilitate timely development of a standard.

Title: Tree Care Operations

Abstract: In the 11-year period from 1992 through 2002 for which ornamental shrub and tree services fatality data are available from BLS, there were 637 fatalities in the industry, an average of about 58 fatalities per year or a rate of about 93 fatalities per 100,000 employees. To prevent many of these fatalities, OSHA will develop a standard on tree-trimming work, including maintaining and removing trees and brush. OSHA has standards on logging and line-clearance tree trimming that have been applied to activities performed by tree-care workers. Although there is an existing national consensus standard on tree-trimming work, American National Standards Institute Standard ANSI Z133.1-2006, Safety Requirements for Arboricultural Operations, OSHA has no comprehensive standard to address this type of work. The ANPRM requested information on such hazards as electrocution, falls, and struck by falling objects, as well as hazards associated with equipment used in tree-trimming work, including chippers, chain saws, and stump cutters.

Title: Combustible Dust

Abstract: The Occupational Safety and Health Administration (OSHA) is considering rulemaking to develop a combustible dust standard for general industry. The U.S. Chemical Safety and Hazard Investigation Board (CSB) completed a study of combustible dust hazards in late 2006, which identified 281 combustible dust incidents between 1980 and 2005 that killed 119 workers and injured 718. The CSB also recommended the Agency pursue rulemaking on this issue. While a number of OSHA standards address aspects of this risk among these are: 1910.22 Housekeeping, 1910.38 Emergency Action Plans, 1910.94 Ventilation, 1910.107 Spray Finishing, 1910.146 Permit Required Confined Spaces, 1910.269 Electric Power Generation, Transmission and Distribution (coal handling), 1910.272 Grain Handling Facilities, 1910.307 Hazard Communication), the Agency does not have a comprehensive standard that addresses combustible dust hazards. The Agency has published a Safety and Health Information Bulletin, Combustible Dust in Industry: Preventing and Mitigating the Effects of Fire and Explosions, and has implemented a Combustible Dust National Emphasis Program (NEP). OSHA will also use information gathered from the NEP as the agency considers future rulemaking.

Title: Occupational Exposure to Hexavalent Chromium; Final Rule Remand

Abstract: OSHA published a final rule on February 28, 2006 on the Occupational Exposures to Hexavalent Chromium. OSHA was subsequently sued on portions of the rulemaking. The United States Court of Appeals for the Third Circuit remanded the employee notification of exposure results provisions of the Hexavalent Chromium final rule to OSHA for the agency to either provide an explanation for its decision to require notification only where employee exposure exceeds the permissible exposure limit (PEL) or take such further action as may be appropriate. The Agency is currently considering how to respond to the court remand.

Title: Confined Spaces in Construction

Abstract: In January 1993, OSHA issued a general industry rule to protect employees who enter confined spaces (29 CFR 1910.146). This standard does not apply to the construction industry because of differences in the nature of the worksite in the construction industry. In discussions with the United Steel Workers of America on a settlement agreement for the general industry standard, OSHA agreed to issue a proposed rule to extend confined-space protection to construction workers appropriate to their work environment.

Title: Electric Power Transmission and Distribution; Electrical Protective Equipment

Abstract: Electrical hazards are a major cause of occupational death in the United States. The annual fatality rate for power line workers is about 50 deaths per 100,000 employees. The construction industry standard addressing the safety of these workers during the construction of electric power transmission and distribution lines is over 35 years old. OSHA has developed a revision of this standard that will prevent many of these fatalities, add flexibility to the standard, and update and streamline the standard. OSHA also intends to amend the corresponding standard for general industry so that requirements for work performed during the maintenance of electric power transmission and distribution installations are the same as those for similar work in construction. In addition, OSHA will be revising a few miscellaneous general industry requirements primarily affecting electric transmission and distribution work, including provisions on electrical protective equipment and foot protection. This rulemaking also addresses fall protection in aerial lifts for work on power generation, transmission, and distribution installations. OSHA published an NPRM on June 15, 2005. A public hearing was held March 6 to 14, 2006. OSHA reopened the record to gather additional information on minimum approach distances.

Title: Walking Working Surfaces and Personal Fall Protection Systems (Slips, Trips, and Fall Prevention)

Abstract: In 1990, OSHA proposed a rule (55 FR 13360) addressing slip, trip, and fall hazards and establishing requirements for personal fall protection systems. Since that time, new technologies and procedures have become available to protect employees from these hazards. The Agency has been working to update these rules to reflect current technology. OSHA published a notice to re-open the rulemaking for comment on a number of issues raised in the record for the NPRM. As a result of the comments received on that notice, OSHA has determined that the rule proposed in 1990 is out-of-date and does not reflect current industry practice or technology. The Agency will develop a new proposal, modified to reflect current information, as well as re-assess the impact.

Title: Cranes and Derricks in Construction

Abstract: A number of industry stakeholders asked OSHA to update the cranes and derricks portion of subpart N (29 CFR 1926.550), specifically requesting that negotiated rulemaking be used. In 2002, OSHA published a notice of intent to establish a

negotiated rulemaking committee. A year later, in 2003, committee members were announced and the Cranes and Derricks Negotiated Rulemaking Committee was established and held its first meeting. In July 2004, the committee reached consensus on all issues resulting in a final consensus document.

Priority: Economically Significant  
 Major: Yes  
 CFR Citation: 29 CFR 1926 (To search for a specific CFR, visit the [Code of Federal Regulations](#).)

 Legal Deadline: None

#### Regulatory Plan:

Statement of Need: There have been considerable technological changes since the consensus standards upon which the 1971 OSHA standard is based were developed. In addition, industry consensus standards for derricks and crawler, truck and locomotive cranes were updated as recently as 2004. The industry indicated that over the past 30 years, considerable changes in both work processes and crane technology have occurred. There are estimated to be 64 to 89 fatalities associated with cranes each year in construction, and a more up-to-date standard would help prevent them.

Legal Basis: The Occupational Safety and Health Act of 1970 authorizes the Secretary of Labor to set mandatory occupational safety and health standards to assure safe and healthful working conditions for working men and women (29 USC 651).

Alternatives: The alternative to the proposed rulemaking would be to take no regulatory action and not update the standards in 29 CFR 1926.550 pertaining to cranes and derricks.

Costs and Benefits: The estimates of the costs and benefits are still under development.

Risks: OSHA's risk analysis is under development.

Title: Updating OSHA Standards Based on National Consensus Standards

Abstract: Under section 6(a) of the OSH Act, during the first two years of the Act, the Agency was directed to adopt national consensus standards as OSHA standards. Some of these standards were adopted as regulatory text, while others were incorporated by reference. In the more than 30 years since these standards were adopted by OSHA, the organizations responsible for these consensus standards have issued updated versions of these standards. However, in most cases, OSHA has not revised its regulations to reflect later editions of the consensus standards. OSHA standards also continue to incorporate by reference various consensus standards that are now outdated and, in some cases, out of print. The Agency is undertaking a multi-year project to update these standards. A notice describing the project was published in the Federal Register on November 24, 2004 (69 FR 68283). The first final rule was published on September 13, 2005. Several additional sets of standards are in preparation. An NPRM on Personal Protective (PPE) consensus standards was published on August 31, 2007, with a hearing on December 4, 2007. A direct final rule (DFR) on Miscellaneous Changes and Welding Definitions was published on December 14, 2007. In the next phase of the project, OSHA intends to publish a DFR to update consensus standards referenced for acetylene, and issue a final rule on the PPE consensus standards.

Title: Hazard Communication

Abstract: OSHA's Hazard Communication Standard (HCS) requires chemical manufacturers and importers to evaluate the hazards of the chemicals they produce or import, and prepare labels and material safety data sheets to convey the hazards and associated protective measures to users of the chemicals. All employers with hazardous chemicals in their workplaces are required to have a hazard communication program, including labels on containers, material safety data sheets (MSDS), and training for employees. Within the United States (U.S.), there are other Federal agencies that also have requirements for classification and labeling of chemicals at different stages of the life cycle. Internationally, there are a number of countries that have developed similar laws that require information about chemicals to be prepared and transmitted to affected parties. These laws vary with regard to the scope of substances covered, definitions of hazards, the specificity of requirements (e.g., specification of a format for MSDSs), and the use of symbols and pictograms. The inconsistencies between the various laws are substantial enough that different labels and safety data sheets must often be used for the same product when it is marketed in different nations. The diverse and sometimes conflicting national and international requirements can create confusion among those who seek to use hazard information. Labels and safety data sheets may include symbols and hazard statements that are unfamiliar to readers or not well understood. Containers may be labeled with such a large volume of information that important statements are not easily recognized. Development of multiple sets of labels and safety data sheets is a major compliance burden for chemical manufacturers, distributors, and transporters involved in international trade. Small businesses may have particular difficulty in coping with the complexities and costs involved. As a result of this situation, and in recognition of the extensive international trade in chemicals, there has been a long-standing effort to harmonize these requirements and develop a system that can be used around the world. In 2003, the United Nations adopted the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). Countries are now adopting the GHS into their national regulatory systems. OSHA is considering modifying its HCS to make it consistent with the GHS. This would involve changing the criteria for classifying health and physical hazards, adopting standardized labeling requirements, and requiring a standardized order of information for safety data sheets.

Priority: Other Significant

Agenda Stage of Rulemaking: Proposed Rule

CFR Citation: 29 CFR 1910.1200; 29 CFR 1915.1200; 29 CFR 1917.28; 29 CFR 1918.90; 29 CFR 1926.59; 29 CFR 1928.21  
(To search for a specific CFR, visit the [Code of Federal Regulations](#).)

Legal Authority: 29 USC 655(b); 29 USC 657

Legal Deadline: None

#### Regulatory Plan:

Statement of Need: Multiple sets of requirements for labels and safety data sheets present a compliance burden for U.S. manufacturers, distributors, and transports involved in international trade. Adoption of the GHS would facilitate international trade in chemicals, reduce the burdens caused by having to comply with differing requirements for the same product, and allow companies that have not had the resources to deal with those burdens to be involved in international trade. This is particularly important for small producers who may be precluded currently from international trade because of the compliance resources required to address the extensive regulatory requirements for classification and labeling of chemicals. Thus every producer is likely to experience some benefits from domestic harmonization, in addition to the benefits that will accrue to producers involved in international trade. Additionally, comprehensibility of hazard information will be enhanced as the GHS will: (1) provide consistent information and definitions for hazardous chemicals; (2) address stakeholder concerns regarding the need for a standardized format for material safety data sheets; and (3) increase understanding by using standardized pictograms and harmonized hazard statements. Several nations, including European Union, have adopted the GHS with implementation schedule through 2015. U.S. manufacturers, employers, and employees will be at a disadvantage in the event that our system of hazard communication is not compliant with the GHS.

Legal Basis: The Occupational Safety and Health Act of 1970 authorizes the Secretary of Labor to set mandatory occupational safety and health standards to assure safe and healthful working conditions for working men and women (29 U.S.C. 651).

Alternatives: The alternative to the proposed rulemaking would be to take no regulatory action.

Costs and Benefits: The estimates of the costs and benefits are still under development.

Risks: OSHA's risk analysis is under development.

Title: Nationally Recognized Testing Laboratories Fee Schedule--Revised Approach

Abstract: The Occupational Safety and Health Administration is proposing to adjust the fees that the Agency charges for the services it provides to Nationally Recognized Testing Laboratories (NRTLs). A number of OSHA standards require that certain products and equipment used in the workplace be tested and certified by an organization that has been recognized by OSHA. OSHA requires NRTL applicants to provide detailed and comprehensive information about their programs, processes, and procedures in writing when they apply. OSHA reviews the written information and conducts an on-site assessment to determine whether the organization meets the requirements of 29 CFR 1910.7. OSHA uses a similar process when an NRTL applies for expansion or renewal of its recognition. In addition, the Agency conducts annual audits to ensure that the recognized laboratories maintain their programs and continue to meet the recognition requirements. In 2000, OSHA began charging NRTLs for the services it provides them. The services are processing of NRTL applications and audits of NRTL operations, and they define the fundamental functions of the NRTL Program. OSHA has determined that its current NRTL fee schedule does not recoup the full costs of the services performed because it does not recover certain indirect costs of those services. These indirect costs stem from attendant activities and accrue to the benefit of those services. OSHA's proposed fee schedule would account for these indirect costs. In determining the revised fee structure, OSHA will follow the guidelines established by the Office of Management and Budget in Circular Number A-25.

Title: Abbreviated Portacount® Quantitative Fit-Testing Protocol

Abstract: Appendix A of OSHA's Respiratory Protection Standard (29 CFR 1910.134) specifies the procedure for adding new test protocols to this standard. OSHA proposes to include two additional protocols for the PortaCount® quantitative fit testing methodology in its Respiratory Protection Standard; the proposed protocols would apply to employers in general industry, shipyard employment, and the construction industry. The revised PortaCount® quantitative fit testing protocols are referred to as the Revised PortaCount® Quantitative Fit Test Protocol 1 and Protocol 2. The only difference between the proposed revised PortaCount® Protocol 1 and the approved PortaCount® protocol is that the revised Protocol 1 requires that the seven test exercises be performed for 30 seconds instead of the 60 seconds per test currently required. The revised Protocol 2 would reduce exercise time to 40 seconds instead of the currently required 60 seconds, eliminate two of the eight fit testing exercises, and would raise the pass/fail criterion from 100 to 200 for half-masks and 500 to 1,000 for full facepieces.

Title: Illinois State Plan for Public Employees Only--Initial State Plan Approval

Abstract: OSHA will propose to grant initial State Plan approval, under section 18 of the Occupational Safety and Health Act and 29 CFR 1956, to the Illinois State Plan for Public Employees Only as submitted by the Illinois Department of Labor. The plan proposes to establish a program for the adoption and enforcement of standards applicable only to the employees of the State of Illinois and its political subdivisions (local government employees) within a 3-year developmental period, which will be at least as effective as Federal OSHA's private sector protection program. Written public comment will be sought on whether initial State plan approval should be granted and an opportunity to interested persons to request an informal public hearing, prior to final action granting initial approval of a developmental State Plan. Initial approval of the Illinois Public Employee Only

State plan is contingent upon a determination that the plan meets, or will meet within three years, OSHA's initial plan approval criteria and the availability of Federal (50%) and State (50%) matching funds.

Title: Procedures for Handling Discrimination Complaints Under Federal Employee Protection Statutes

Abstract: Section 629, the employee protection provision of the Energy Policy Act of 2005, amended the Energy Reorganization Act of 1978, 42 U.S.C. section 5851. The amendments add Department of Energy and Nuclear Regulatory Commission employees to the employees covered under the Act, as are contractors and subcontractors of the Commission. In addition, Congress added a "kick-out" provision allowing the complainant to remove the complaint to District Court if the Secretary of Labor has not issued a final decision within a year of the filing of the complaint. These are significant changes to the ERA, necessitating immediate revision of the regulations, 29 CFR part 24, Procedures for the Handling of Discrimination Complaints under Federal Employee Protection Statutes, which governs whistleblower investigations under the Energy Reorganization Act of 1978 as well as under the six EPA statutes.

Title: Abbreviated Bitrix Qualitative Fit-Testing Protocol

Abstract: The Occupational Safety and Health Administration (OSHA) published the revised standard for respiratory protection on January 8, 1998. Appendix A of this standard currently lists four challenge agents permitted for use in qualitative fit testing protocols; these include isoamyl acetate, saccharin aerosol solution, irritant smoke, and Bitrix (denatonium benzoate). The standard also includes procedures that allow parties to submit new fit testing protocols for notice-and-comment rulemaking under section 6(b)(7) of the Occupational Safety and Health Act. OSHA has been requested to consider adding a new fit testing protocol that modifies the existing Bitrix protocol, and is undergoing rulemaking to seek public comment and determine whether to amend the fit testing provisions of the standard to include the proposed protocol. The NPRM was published on December 26, 2007.

Title: Procedures for Handling Employee Retaliation Complaints Under the National Transit Systems Security Act of 2007; Surface Transportation Assistance Act of 1982, as Amended; and Federal Rail Safety Act

Abstract: OSHA will implement procedures for the handling and investigation of retaliation complaints pursuant to section

1521 of the Implementing Recommendations of the 9/11 Commission Act of 2007. This Act amended the Federal Rail Safety Act (FRSA), to establish a new whistleblower protection provision to be administered by OSHA that provides protections from retaliation to employees working for railroad carriers and their contractors and subcontractors who report potential violations or engage in certain activities related to safety and security. OSHA will implement procedures for the handling and investigation of retaliation complaints pursuant to section 1413 of the Implementing Recommendations of the 9/11 Commission Act of 2007. Section 1413, known as the National Transit Systems Security Act (NTSSA), included a new whistleblower protection provision to be administered by OSHA that provides protection from retaliation to employees of public transportation agencies and their contractors and subcontractors who report potential violations or engage in certain activities related to safety and security. OSHA will amend 29 CFR 1978, the procedures applicable to the handling and investigation of whistleblower complaints under the Surface Transportation Assistance Act (STAA), 49 U.S.C. 31105, to implement statutory changes enacted by Congress under section 1536 of the Implementing Recommendations of the 9/11 Commission Act of 2007, and to provide other procedural updates as needed. The statute provides retaliation protection to employees working for commercial motor carriers who report potential violations or engage in certain activities related to safety and security. Pursuant to these statutes, the rules will set forth the procedures for handling and investigating retaliation complaints, including a statutory "kick-out" provision allowing the complainant to file the complaint in District Court if the Secretary of Labor has not issued a final decision within 210 days of the filing of the complaint. Immediate implementation of these regulations is necessitated to govern whistleblower investigations conducted under the new and revised statutes.

Title: Hearing Conservation Program for Construction Workers

Abstract: OSHA issued a section 6(b)(5) health standard mandating a comprehensive hearing conservation program for noise-exposed workers in general industry in 1983. However, no rule was promulgated to cover workers in the construction industry. A number of recent studies have shown that many construction workers experience work-related hearing loss. In addition, the use of engineering, administrative, and personal protective equipment to reduce exposures to noise is not extensive in this industry. OSHA published an advance notice of proposed rulemaking to gather information on the extent of noise-induced hearing loss among workers in different trades in this industry, current practices to reduce this loss, and additional approaches and protections that could be used to prevent such loss in the future. Work continues on collecting and analyzing information to determine technological and economic feasibility of possible approaches.

Title: Emergency Response and Preparedness

Abstract: Emergency responder health and safety is currently regulated primarily under the following standards: The fire brigade standard (29 CFR 1910.156); hazardous waste operations and emergency response (29 CFR 1910.120); the respiratory protection standard (29 CFR 1910.134); the permit-required confined space standard (29 CFR 1910.146); and the bloodborne pathogens standard (29 CFR 1910.1030). Some of these standards were promulgated decades ago and none were designed as comprehensive emergency response standards. Consequently, they do not address the full range of hazards or concerns currently facing emergency responders. Many do not reflect major changes in performance specifications for protective clothing and equipment. Current OSHA standards also do not reflect all the major developments in safety and health practices that have already been accepted by the emergency response community and incorporated into National Fire Protection Association (NFPA) and American National Standards Institute consensus standards. OSHA will be collecting information to evaluate what action the agency should take. The Request for Information was published on September 11, 2007.

Title: Standards Improvement

Abstract: OSHA is continuing its efforts to remove or revise duplicative, unnecessary, and inconsistent safety and health standards. This effort builds upon the success of the Standards Improvement Project (SIP) Phase I published on June 18, 1998 (63 FR 33450), and Phase II published on January 5, 2005 (70 FR 1111). The Agency believes that such changes can reduce compliance costs and reduce the paperwork burden associated with a number of its standards. The Agency will only consider such changes if they do not diminish employee protections. To initiate the project, OSHA published an advance notice of proposed rulemaking (ANPRM) on December 21, 2006, to solicit input from the public on rules that may be addressed in Phase III of SIP. The Agency plans to include both safety and health topics in Phase III.

Title: Revision and Update of Standards for Power Presses

Abstract: The Occupational Safety and Health Administration's (OSHA) mechanical power press standard (29 CFR 1910.217) protects employees from injuries that result from working with or around mechanical power presses through the use of machine guards (prevents hands in danger zone) and through limitations on initiation of a press cycle (either two-hand or foot-operated). A presence-sensing device (PSD), typically a light curtain, initiates a press cycle only when the system indicates that no objects, such as a hand, are within the hazard zone. OSHA adopted the use of presence-sensing device initiation (PSDI) on mechanical power presses believing that the provision would substantially protect workers and improve productivity. However, OSHA requires PSDI systems to be validated by an OSHA-certified third party, and no organization has agreed to validate PSDI installations. OSHA performed a look-back review of PSDI and determined that the current ANSI standard permits PSDI without independent validation but includes other provisions to maintain PSDI safety. Based on the look-back review of PSDI (69 FR 31927), OSHA is planning to revise and update the standard on power presses, which currently covers only mechanical power presses. OSHA is currently planning to base the revision of the Mechanical Power Presses standard on the most recent version of the American National Standards Institute standard on Mechanical Power Presses, ANSI B11.1. Further, OSHA is considering

expanding the standard to cover other presses such as hydraulic and pneumatic power presses and to include the latest guarding techniques. This revision will provide the first major update of the Mechanical Power Presses Standard since it was originally published in 1971.

Title: Cooperative Agreements

Abstract: OSHA proposes to revise its regulations for the federally funded On-site Consultation Program to: a) provide a 1-year deletion from OSHA's programmed inspection schedule for those employers who request and receive a full service safety and health, consultation visit; agree to correct identified hazards within established time frames; post notice of identified hazard(s) and begin to implement procedures for regularly identifying and preventing hazards; b) provide a deferral from OSHA's programmed inspection schedule for up to 18 months for those employers working toward achieving recognition and exemption status; c) extend the deletion period from OSHA's programmed inspection schedule for a period of up to 2 years for those employers participating in OSHA's recognition and exemption program; and d) allow Compliance Safety and Health Officers to proceed with enforcement visits resulting from referrals at sites undergoing Consultation visits and at sites that have been awarded Safety and Health Achievement Recognition Program (SHARP) status. Note: SHARP is a recognition program that OSHA administers to provide incentives and support for small employers to develop, implement, and continuously improve effective safety and health programs at their worksites.

Title: Longshoring and Marine Terminals--Reopening of the Record (Vertical Tandem Lifts (VTLs))

Abstract: OSHA issued a final rule on Longshoring on July 25, 1997 (62 FR 40142). In that rule, the Agency reserved

provisions related to vertical tandem lifts. Vertical tandem lifts (VTLs) involve the lifting of two or more empty intermodal containers, secured together with twist locks. OSHA worked with national and international organizations to gather additional information on the safety of VTLs. The Agency published an NPRM to address safety issues related to VTLs. The extended comment period concluded February 13, 2004, and an informal public hearing was held on July 29 to 30, 2004. The rulemaking record closed on June 27, 2005. The Agency published a final rule on December 10, 2008.

Title: Amendment of Standards To Clarify the Individualized Nature of Employer Duties To Provide PPE and Train Employees

Abstract: OSHA amended its standards for general industry, maritime and construction to clarify that when a standard requires the employer to provide PPE to employees, or train employees, each employee not provided PPE or trained is a separate instance of a violation of the standard. The amendment clarifies the remedy available to OSHA for violations of the PPE and training standards; it does not change the standards' substantive requirements in any way and will add no new regulatory burden. A variety of OSHA standards require that employers provide and ensure the use of appropriate personal protective equipment (PPE), such as respirators or protective clothing, where necessary because of a workplace hazard. The specific language of the standards varies. For example, the respiratory protection provisions of most specific standards state that "for employees who use respirators required by this section, the employer must provide respirators that comply with the requirements of this paragraph," See, for example, 29 CFR 1926 1101(h) (1), while the coke oven emissions standard, 29 CFR 1910.1029(h) requires employers "to provide and ensure the use of" flame resistant clothing and other protective gear. OSHA standards also require that employers train employees on hazards to which they may be exposed, including hazards requiring PPE. Some training provisions, such as the provision in the general industry PPE standard, 29 CFR 1910.132(f), specifically state that training must be provided to "each employee" required to use PPE. Other training provisions are more generally worded. For example, the training provision in the hazard communication standard, 29 CFR 1910.1200(h) states that "employers

shall provide employees with effective information and training on hazardous chemicals in their work area at the time of their initial assignment and whenever [a new hazard is introduced].” Despite minor differences in wording between them, all standards requiring employers to provide PPE to employees because of a hazard required the employer to provide the PPE to each individual employee covered by the requirement. Similarly, standards requiring employers to provide training to employees require the employer to train each individual employee. The Agency has consistently maintained that each employee not provided PPE or trained is a separate instance of a violation that may, in appropriate circumstances, be separately cited. The Occupational Safety and Health Review Commission has suggested that variations in the wording of OSHA’s PPE and training provisions may affect the agency’s authority to assess per-employee violations. In *Secretary of Labor v. Eric K. Ho, Ho Ho Ho Express, Inc. and Houston Fruitland, Inc.*, 20 O.S.H. Cas. (BNA) 1361, 1371-72 (Review Comm’n 2003), the Commission majority ruled that the Secretary could not issue per-employee citations for failure to provide respirators under a prior provision of the construction asbestos standard. In a later decision, the Commission stated that the slightly different language of the general respirator provision requirement in the lead standard permitted per-employee citations. *Secretary of Labor v. Manganas Painting Co., Inc.*, 21 O.S.H. Cas. (BNA) 1964, 1998-99 (Review Comm’n 2007). The amendment clarifies the agency’s ability to issue per-instance violations for each employee not trained or not provided PPE under general industry, construction and maritime standards requiring training and PPE.

Title: Verification of Underground Coal Mine Operators' Dust Control Plans and Compliance Sampling for Respirable Dust

Abstract: MSHA's current standards require that all underground coal mine operators develop and follow a mine ventilation plan for each mechanized mining unit that we approve. However, we do not have a requirement that provides for verification of each plan's effectiveness under typical mining conditions. Consequently, plans may be implemented by mine operators that could be inadequate to control respirable dust. In response to comments received on the July 2000 proposed rule for MSHA to withdraw the rule, MSHA published a new proposed rule on March 6, 2003. The proposed rule would have required mine operators to verify, through sampling, the effectiveness of the dust control parameters for each mechanized mining unit specified in the approved mine ventilation plan. The use of approved powered air-purifying respirators and/or verifiable administrative controls would have been allowed as a supplemental means of compliance when MSHA had determined that all feasible engineering or environmental controls were exhausted. Public hearings were held in May 2003, and the comment period, originally scheduled to close on June 4, 2003, was extended until July 3, 2003. On June 24, 2003, MSHA announced that all work on the final rule would cease and the rulemaking record would remain open in order to obtain information concerning Continuous Personal Dust Monitors being tested by NIOSH. A Federal Register notice was published on July 3, 2003, extending the comment period indefinitely. NIOSH issued a report on the continuous personal dust monitor in September 2006 and another report concerning test results in June of 2007. MSHA will publish a notice soliciting additional comments.

Title: Determination of Concentration of Respirable Coal Mine Dust

Abstract: The National Institute for Occupational Safety and Health (NIOSH) and the Mine Safety and Health Administration (MSHA) jointly proposed that a single, full-shift measurement (single sample) would accurately represent the atmospheric condition to which a miner is exposed. The proposed rule addresses the U.S. Court of Appeals' concerns raised in *National Mining Association v. Secretary of Labor*, 153 F.3d 1264 (11th Cir. 1998). MSHA and NIOSH reopened the rulemaking record on March 6, 2003, to obtain comments on documents added to the rulemaking record since the proposed rule was published July 7, 2000. MSHA held hearings in May 2003 and the comment period, originally scheduled to close on June 4, 2003, was extended until July 3, 2003. However, on June 24, 2003, MSHA announced that all work on the final rule would cease. On August 12, 2003, the Agencies reopened the rulemaking record and extended the comment period indefinitely. MSHA collaborated with NIOSH, miners' representatives, industry, and the manufacturer to test the production prototype Continuous Personal Dust Monitor (CPDM) unit. NIOSH issued a report on the CPDM in September 2006 and another report concerning test results in June 8, 2007. MSHA will publish a notice soliciting additional comments.

## Title: Revising Electrical Product Approval Regulations

Abstract: 30 CFR part 18 (Electric Motor-Driven Mine Equipment and Accessories) describes the approval requirements for electrically operated machines and accessories intended for use in underground gassy mines, and for related matters, such as approval procedures, certification of components, and acceptance of flame-resistant hoses and conveyor belts. Aside from minor modifications, part 18 has been largely unchanged since it was promulgated in 1968. MSHA is proposing revisions to improve the efficiency of the approval process, recognize new technology, add quality assurance provisions, address existing policies through the rulemaking process, and reorganize portions of the approval regulations. MSHA will be addressing the requirements in this NPRM in phases. The first phase will be Flame-Resistance Testing of Mining Materials. This action will be published first because the MINER Act requires all life lines to be flame-resistant by June 14, 2009. The flame-resistance requirements are contained in 30 CFR part 18. Phase 1 was completed with the final rule published on December 31, 2008 (73 FR 8058). The second phase will be Intrinsic Safety Requirements. This action will be published second because the MINER

Act requires underground coal mine operators to submit an Emergency Response Plan (ERP) that sets forth a means of providing post-accident communication and electronic tracking by June 15, 2009.

Title: Field Modifications of Permissible Mobile Diesel-Powered Equipment

Abstract: The implementation of diesel regulations in 30 CFR parts 30 CFR 7, 30 CFR 36, 30 CFR 57, 30 CFR 72, and 30 CFR 75 has resulted in an increase in requests from owners of approved equipment, typically underground mine operators, to field modify permissible diesel-powered equipment. Field modifications allow permissible equipment to be modified for mine-specific use or to comply with new diesel standards. Therefore, the Mine Safety and Health Administration is proposing to add field modification provisions to 30 CFR part 36 (Approval Requirements for Permissible Mobile Diesel-Powered Transportation Equipment). This proposed rule would codify the field modification process for part 36 field modification acceptances, expand the field modification process to allow mine operators to apply for field modifications, and continue to ensure that field-modified equipment operates safely in gassy underground mines. The proposed rule would also implement existing policy, which dates from 1985, to reflect current procedures for processing field modifications related to mobile diesel-powered transportation equipment. Further, the proposed rule would require labeling provisions for all new field modifications accepted under part 36. These new provisions would enhance miner safety.

Title: High-Voltage Continuous Mining Machine Standard for Underground Coal Mines

Abstract: MSHA's July 16, 2004, NPRM (69 FR 42812) proposed to establish design requirements for approval of high-voltage continuous mining machines operating where miners work in underground mines. The rule also proposed to establish new mandatory electrical safety standards for the installation, use, and maintenance of the high-voltage continuous mining machines used in underground coal mines. MSHA published a supplemental NPRM on March 28, 2006 (71 FR 15359). The supplemental NPRM proposed and requested comments on two issues arising from oral and written comments that MSHA received during the hearing and post-hearing comment period on the NPRM. These issues involved: (1) Types of trailing cables that can be used with high-voltage continuous mining machines; and (2) a requirement to use high-voltage insulating gloves or other personal protective equipment when handling energized high-voltage trailing cables. MSHA regularly receives petitions for modifications from coal mine operators seeking permission to use high-voltage continuous mining machines. MSHA believes that, with appropriate safeguards, such machines are safe for use and routinely grants these petitions.

Title: Mine Rescue Teams

Abstract: The United States Court of Appeals for the District of Columbia Circuit invalidated a portion of MSHA's Mine Rescue Teams final rule, applicable to underground coal mines. The Court's ruling requires state employees on state-sponsored mine rescue teams to train at small mines semi-annually instead of annually and to participate in two mine rescue contests annually instead of one. In addition, mine-site teams at small mines will have to train semi-annually instead of annually. MSHA will publish a final rule to conform the existing rule to the Court's decision.

Title: Respirable Crystalline Silica Standard

Abstract: Current standards limit exposures to quartz (crystalline silica) in respirable dust. The coal mining industry standard is based on the formula 10mg/m<sup>3</sup> divided by the percentage of quartz where the quartz percent is greater than 5.0 percent calculated as an MRE equivalent concentration. The metal and nonmetal mining industry standard is based on the 1973 American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Values formula: 10 mg/m<sup>3</sup> divided by the percentage of quartz plus 2. Overexposure to crystalline silica can result in some miners developing silicosis, an irreversible but preventable lung disease, which ultimately may be fatal. Both formulas are designed to limit exposures to 0.1 mg/m<sup>3</sup> (100ug) of silica. The Secretary of Labor's Advisory Committee on the Elimination of Pneumoconiosis Among Coal Mine Workers made several recommendations related to reducing exposure to silica. NIOSH recommends a 50 ug/m<sup>3</sup> exposure limit for respirable crystalline silica, and ACGIH recommends a 25 ug/m<sup>3</sup> exposure limit. MSHA will publish a proposed rule to reduce the exposure limit for respirable crystalline silica.

Title: Coal Mine Dust Personal Monitors

Abstract: Existing 30 CFR part 74, specifies requirements for approval of coal mine dust personal sampler units designed to determine the concentrations of respirable coal dust in coal mine atmospheres; procedures for applying for such approval; tests procedures; and labeling. This rulemaking established new requirements that both the National Institute for Occupational Safety and Health (NIOSH) and Mine Safety and Health Administration (MSHA) would use to approve coal mine dust personal samplers. The requirements would permit the approval of a new type of device, the "continuous personal dust monitor." It would also update design specifications for the coal mine dust personal sampler units to include improvements made to this device in the past 15 years. This rulemaking does not address the requirements in 30 CFR parts 70, 71, and 90 on the use of dust samplers.

Title: Occupational Exposure to Coal Mine Dust (Lowering Exposure Limit)

Abstract: The Federal Coal Mine Health and Safety Act of 1969 established the first comprehensive respirable dust standards for coal mines. These standards were designed to reduce the incidence of coal workers' pneumoconiosis (black Lung) and silicosis and eventually eliminate these diseases. While significant progress has been made toward improving the

health conditions in our Nation's coal mines, miners continue to be at risk of developing occupational lung disease, according to the National Institute for Occupational Safety and Health (NIOSH). In September 1995, NIOSH issued a Criteria Document in which it recommended that the respirable coal mine dust permissible exposure limit (PEL) be cut in half. In February 1996, the Secretary of Labor convened a Federal Advisory Committee on the Elimination of Pneumoconiosis Among Coal Miners (Advisory Committee) to assess the adequacy of MSHA's current program and standards to control respirable dust in underground and surface coal mines, as well as other ways to eliminate black lung and silicosis among coal miners. The Committee represented the labor, industry, and academic communities. The Committee submitted its report to the Secretary of Labor in November 1996, with the majority of the recommendations unanimously supported by the Committee members. The Committee recommended that MSHA consider lowering the coal dust PEL. Recent NIOSH data indicates increased prevalence of CWP "clusters" in several geographical areas; particularly in the Southern Appalachian Region. MSHA will publish a proposed rule to lower the coal mine dust permissible exposure limit.

Title: Refuge Alternatives for Underground Coal Mines

Abstract: MSHA is investigating refuge alternatives for use in underground coal mines. Refuge alternatives, such as rescue chambers, and other structures or systems, could be used to increase the survival of miners trapped underground. Section 13 of the Mine Improvement and New Emergency Response Act of 2006 requires the National Institute for Occupational Safety and Health (NIOSH) to study refuge alternatives. Section 112(b) of the Consolidated Appropriations Act of 2008 requires MSHA to propose regulations by June 15, 2008, consistent with the recommendations of NIOSH, requiring rescue chambers in underground coal mines, or facilities that provide at least the same measure of protection, and to finalize the regulations by December 31, 2008.

Title: Flame Resistant Conveyor Belts, Fire Protection and Detection, and Use of Air From the Belt Entry

Abstract: The proposal would implement the recommendations of the Technical Study Panel (Panel) for the Utilization of Belt Air and the Composition and Fire Retardant Properties of Belt Material in Underground Coal Mining. Consistent with the MINER Act, the proposal includes MSHA's response to the Panel's report. Based on the Panel's recommendations, MSHA is proposing new and revised safety standards for underground coal mines concerning 15 of the 20 recommendations. The remaining recommendations would not require rulemaking. MSHA proposes new standards for: conveyor belt flammability; qualifying Atmospheric Monitoring System operators; levels of methane and respirable dust in belt entries; airlocks between air courses; minimum and maximum air velocities; approval for the use of air from the belt entry to ventilate working sections; monitoring and remotely closing point-feed regulators; smoke sensors; standardized tactile signals on lifelines; replacing point-type heat sensors with carbon monoxide sensors; and belt conveyor and belt entry maintenance.

Title: Requirements for DOL Agencies' Assessment of Occupational Health Risks

Abstract: The Department of Labor is proposing requirements for its Agencies to follow when preparing risk assessments in conjunction with the development of health standards governing occupational exposure to toxic substances and hazardous chemicals. The proposed rule requires DOL agencies to follow a consistent, reliable, and transparent set of procedures when conducting risk assessments, outlines the components that should be included in a risk assessment, and provides for improved public access to rulemaking information.
