Subject: Cover women"s preventive health care completely
Date: Wednesday, August 10, 2011 6:21:46 PM

I join with many others in asking you to make preventive health care for women the rule for insurance coverage. In our country we have a separation of church and state, so no one should be able to decide for women whether or not they will be able to receive these covered services. Any employees who do not want the services will, of course, not be compelled to have them.

Please ensure that women have access to preventive health care. It means that many fewer of them will suffer complications to their health. Also please reject any religious refusal exemption proposals. We have many who believe a certain way, but because of the legal separation of church and state in this country, their opinions should not impact those who may believe differently.

Thank you for your consideration.
