

Exploring New System Features - Admin

Upgrade Update

The new release of LearningLink will be available February 27, 2012.

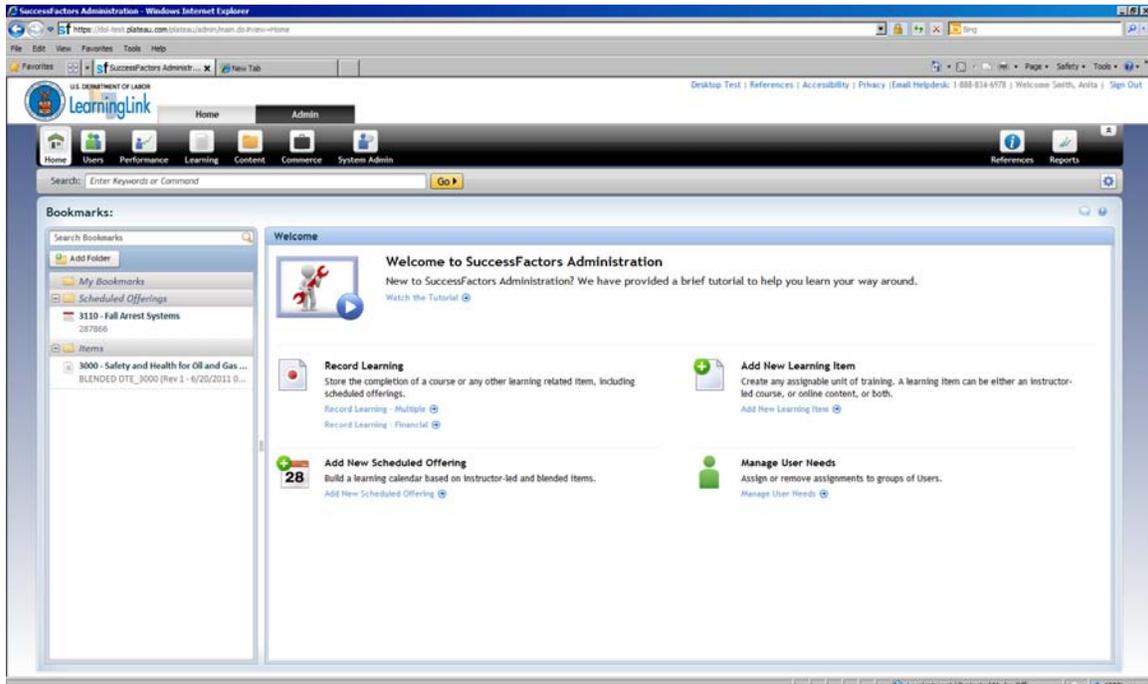

New Features

Explore the new available features in the upcoming release of LearningLink!

- Administrators with student accounts can log into LearningLink from the same page.
- Ability to Bookmark Items, Curricula, and Scheduled Offerings
- Ability to export search results to Microsoft Excel
- Record tabs display on side instead of on top

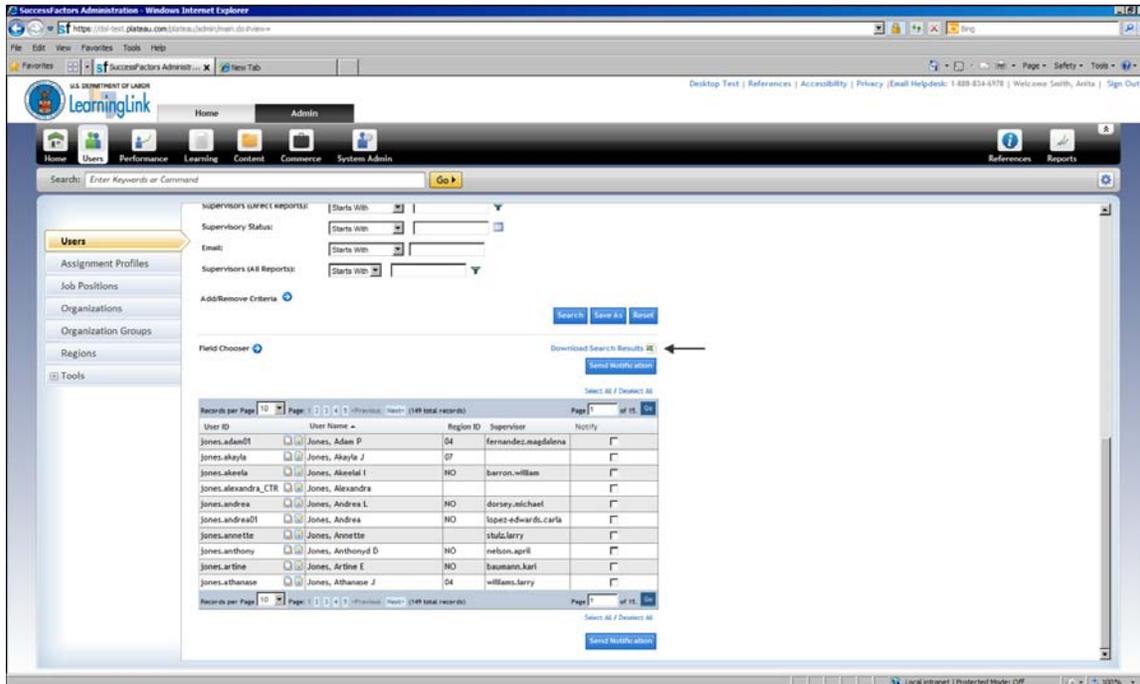

1. Administrator accounts can be linked to student accounts. Therefore, administrators can log in from one site.
2. Administrators have the ability to bookmark Items, Curricula, and Scheduled Offerings. Administrators can access the bookmarks from his/her home page.

Admin view: Home Tab and Admin Tab

The illustration above is the Admin Home Page with the Home and Admin Tab displaying and an example of Scheduled Offerings and Items bookmarks.

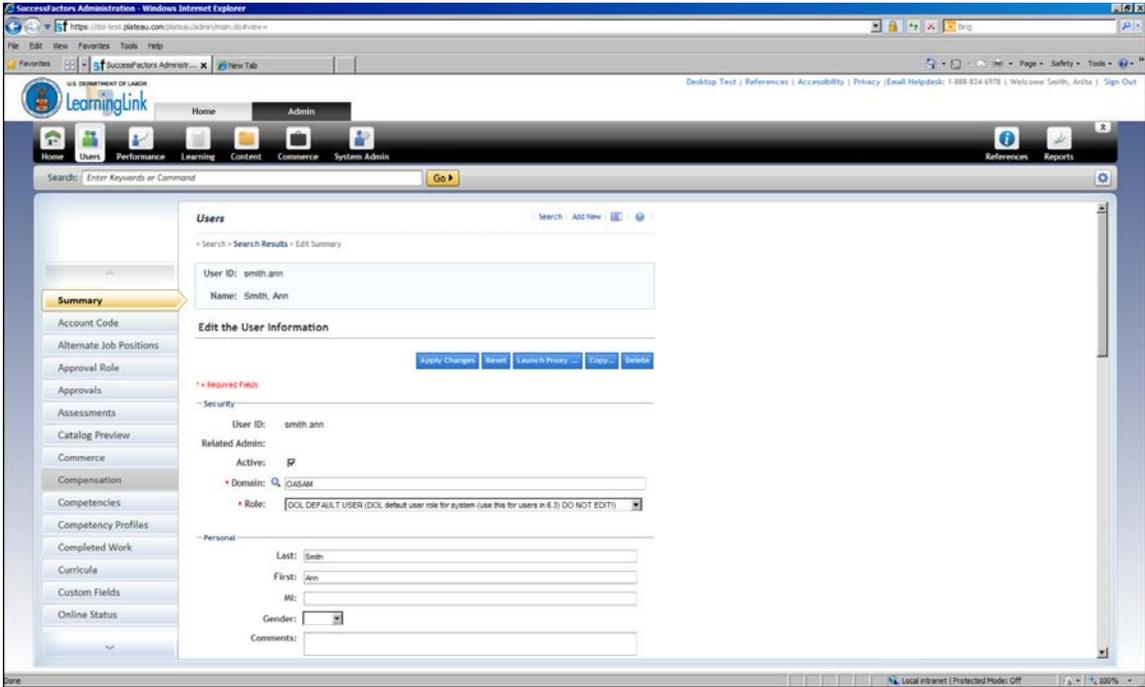

3. After an Administrator conducts a search within LearningLink, the administrator has the ability to export the search results to Microsoft Excel.

The illustration above is the User Search page with search results displaying and an arrow pointing to the Download Search Results icon.

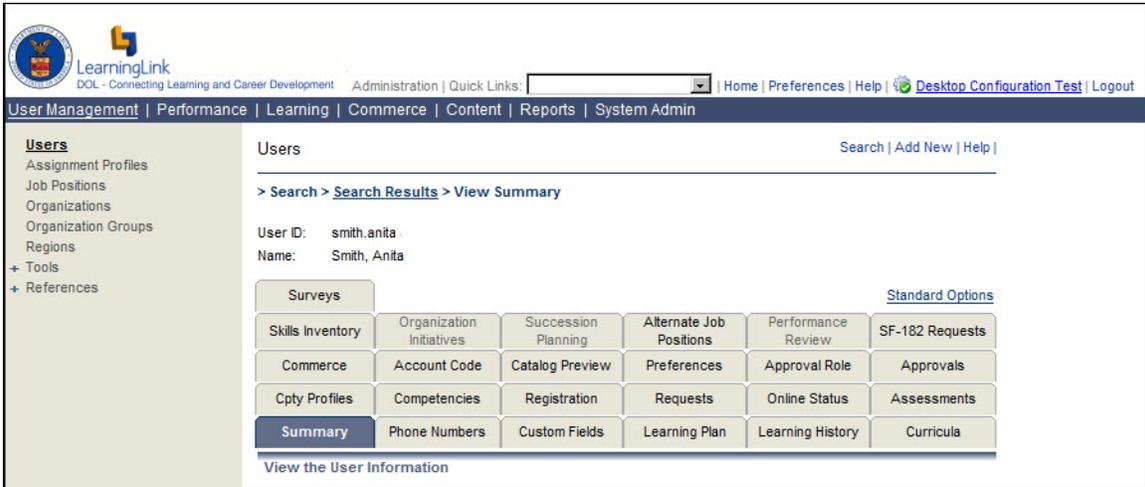

- When an administrator views or edits a record, the tabs will appear on the left side of the page instead of toward the top. The arrows above and below the tabs allow the administrator to navigate to the desired tab.

New Release:
