

# VAM/FAST Inventory Year-to-Year Comparison

## Department of Labor

This report compares the most recent VAM Summary provided by your agency against the actual inventory (for years available) and planned inventory numbers reported by your agency during the annual FAST data call. It is expected that these two data sets will follow each other over the life of the VAM as your agency works toward an optimal fleet. Significant differences between the two (greater than 20%) will be highlighted in yellow and should be addressed in your Fleet Management Plan and Budget Summary document to be submitted to GSA/OMB each year.
