If the government can't manage Medicare Medicaid and throws Social Security away what makes you think we would approve of you tampering with our 401K's? And just who gets the proceeds if the recipient dies prior to collecting on all their hard earn dollars, family or the government?

You want to correct the Social Security system and Medicare/Medicaid we have two simple options

- Pull the golden retirement/medical for legislators and put them in the same system as their constituent's percentage of contribution and return at retirement. As these are such great programs they should come along and belong. No more benefits for SSI or medical for any and all illegal immigrants. Most of us know that they can collect more than those of us that have contributed all our lives.

This would definitely put us in the red without raising fees and taxes.
