Are you crazy???? Why would I want the US government anywhere near my 401K of which I contributed the maximum amount? The government has failed in every business in which it has stuck it's head: Social Security, Medicare, Head Start, and now the unwanted Health Care.

This is my money to do as I please and not the government's. I will take it out and put it in my mattress before I will let the government have it. This is the most socialistic, idiotic idea I have heard of. Why don't you try fixing things before breaking others? The congress and senate do not have any investment in fixing social security or medicare because they are not using it. Their pensions should be done away with. No one else gets pensions of the same salary you have for life. Their insurance should be the same as anyone else. What makes them better than us? We're the ones paying the salaries and yet they live better than we do. Why should the vote themselves raises? The last I knew it was my employer that decided my raise. We are the employers and we should have a say. We're not getting 3% raises. My husband will be lucky to get 1% this year. I'm still unemployed after 8 months and after 17 years of employment.

Start running the government as a business instead of just putting a inadequate band-aid on everything.
