The Request for Information Regarding Lifetime Income Options for Participants and Beneficiaries in Retirement Plan put forth by the Department of the Treasury and the Department of Labor is arrogant and underhanded. This is the seed of a power grab and money grab that needs some Roundup. Not only do I not need any security from Washington. I don't want any. I don't want to pay for other's desire for this supposed security either. The idea that the Federal government is to provide economic security is a farce. Focus on the incentives. Improve our economic freedom and leave the rest to the people. Rather than rant about my disgust with this effort, I ask that you put a stop to it. How this is done, I do not know. I appeal to your sense of duty to sort that out and kill this thing Please! Sincerely, Jeff Vandewinckel Arlington, TN
