To Whom It May Concern:

WHAT NEXT ? FREE LOBOTOMIES for government employees! GET a grip and let the tax payer think for themselves. They have enough brains to pay taxes , therefore they might have the brains to what is right for their own conscience in relation to reproduction and matters of a personal nature. GET OUT of MY personal life! Maybe we should make a law to sterilize all government employees that "think" of the nations public welfare and health!
To ensure they don't overtake the thinking public,with vast numbers of follower types.

Rescind the unjust and coercive mandate that all "contraceptives" and sterilization procedures be covered by private health insurance with no co-pay to patients. If you do not reverse course I ask you to expand conscience protections for any organizations that provide individual and group insurance and have moral or religious objections. I strongly oppose the government forcing free insurance coverage on Americans especially for drugs and devices that I oppose because some of these can cause an abortion (such as ella and Plan B).

This legal mandate clearly violates the spirit of conscience laws which prohibit government discrimination against those who object to various health services on moral or religious grounds. The definition of "religious employer" in the regulation is so narrow as to only include churches, but will still mean that a host of businesses and organizations that have conscience objections will be required to choose between either violating their conscience or not being able to offer employees health insurance. Oh, don't FORGET John Q PUBLIC too!

Please protect the conscience rights of insurers, providers and people like me who object to being forced by the federal government to offer or subsidize contraceptives and sterilization services, especially when some of these drugs can take the life of early unborn children. No Americans should be forced by the federal government to essentially subsidize services they object to. I again urge you in the strongest way possible to reverse course and remove contraceptives and sterilizations from the list of mandatory preventive services.

Sincerely,
jimmy pont
