To Whom It May Concern:

Please, I earnestly urge you to remove the mandate that all "contraceptives" and sterilization procedures be covered by private health insurance with no co-pay to patients. This forces us to pay for items that violate our conscience. I strongly oppose the government forcing free insurance coverage on Americans especially for drugs and devices that I oppose because some of these can cause an abortion (such as ella and Plan B).

Please provide an expanded conscience protection for the many organizations (not just a narrow definition of a religious employer) that provide individual and group insurance and object to this provision for moral or religious reasons. This legal mandate clearly violates the spirit of conscience laws which prohibit government discrimination against those who object to various health services on moral or religious grounds.

The definition of "religious employer" in the regulation is so narrow as to only include churches, but will still mean that a host of businesses and organizations that have conscience objections will be required to choose between either violating their conscience or not being able to offer employees health insurance.

Please protect the conscience rights of insurers, providers and people like me who object to being forced by the federal government to offer or subsidize contraceptives and sterilization services, especially when some of these drugs can take the life of early unborn children. No Americans should be forced by the federal government to essentially subsidize services they object to.

I again urge you in the strongest way possible to reverse course and remove contraceptives and sterilizations from the list of mandatory preventive services.

Sincerely,
Christine Jacobs
