Subject: Don't deny contraceptive coverage to any woman!
Date: Friday, September 23, 2011 5:32:27 PM

Preventive care keeps women healthy! Requiring insurers to cover preventive health care like contraception, breast feeding support and screening for domestic violence and HIV, without charging co-pays, keeps these services affordable for more women. Also it helps women stay healthy.

Employers should not be able to deny a woman this coverage. Medical experts agree on the necessity of preventive health care for all women. They also agree that contraception belongs as part of preventive care. Religious employers should not be given the power to leave contraceptive coverage out of their insurance plans because it will exclude some women from receiving the care they need to be healthy, undergo healthy pregnancies and give birth to healthy babies. Let a woman decide, she knows her body and beliefs better than her bosses!

Please remove the proposed religious employer refusal provision from your Women's Preventive Services rule.
