Dear Ms. Sebelius;

Regarding the upcoming decisions on Public Policies where contraception for women is concerned, I ask you to realize that contraception is a major part of preventive care for women, and access to wide-ranging contraceptive care is in the best interest of women's health, children, and our communities.

I ask you to please support cost-sharing for preventive care services like contraception. There are so many issues related to women's well being and that of a child that she is not ready to bring into the world, that affect not only our society and how we live as a whole, but most importantly the health and well-being of those involved.

Please do not allow anymore unnecessary and unreasonable delays in access to contraceptive care as part of preventive health services.

We need your help to ensure access to family planning services especially in the dawn of health care reform for women, families, and communities.

Thank you so much for your part in making this happen in a timely fashion! Sincerely, Linda Wool
