General Comment

re: RIN 1210 - AB32

For your information. The trading of stock options within my IRA has provided extremely safe and profitable growth. In fact with the vulnerability of the stock market options trading actually helps erase the losses I have incurred by the trading of common stocks. I believe that millions of American citizens have experienced the same benefits. It is critical that those of us in retirement have every tool available to us to stabilize and grow our nest egg. By controlling stock options trading or eliminating them all together you will be stripping millions of people of another way to have a stable retirement. I notice that you show estimates of how much money the "government" will save by taking these actions. I believe the goal here is to consider what savings stability will be destroyed by your actions. Please leave our retirement savings alone.

Thank you

Robert DeLong
