**Subject:** DOL Fiduciary rule

I have been an insurance agent and financial rep. for 30 years in March . I cannot believe that our government wants to tear down not only middle class americans ability to receive the financial advice they need from professional advisors, but also to hinder professional people such as myself the ability to make a living, pay our taxes , which by the way pays the salaries of those who propose this really poor legislation: This could very well implode an already damaged economy by reducing income, and most of all cause many middle class people who depend on financial advice from professionals, who know whats best for their clients to make mistakes in their retirement planning . Mistakes cost everyone money ! The average middle class American cannot afford to be compromised and denied the help they need because of this legislation. This needs to stop immediately ! I will urge everyone I talk to and can send information to vote against anyone who supports this rule the next election. People need choices . The Constitution plainly states this ! Stand up against this travesty that the DOL is trying to force down the throats of hard working Americans who hope to retire comfortably and not suffer the consequences of mistakes, which in most cases would be caused by lack of choice and access to the financial planning they so desperately depend on ! Thank You ! Jerry Fromm
