This is to inform you that on October 1, 2010, the plan actuary certified to the U.S. Department of the Treasury, and also to the Plan Sponsor, that the plan will be in Endangered Status for the plan year beginning October 1, 2010. Federal law requires that you receive this notice.

Endangered Status

The plan is considered to be in endangered status because it has funding or liquidity problems, or both. More specifically, the plan's actuary has determined that, as a result of the significant investment losses incurred by the Pension Fund since mid-2008, the Plan is projected to have an accumulated funding deficiency in at least one of the next seven years. This means that the accumulated value of Employer Contributions will not meet IRS minimum funding requirements.

Funding Improvement Plan and Possibility of Reduction in Future Benefits

Federal law requires pension plans in endangered status to adopt a funding improvement plan aimed at restoring the financial health of the plan. While in

endangered status, the Trustees are not permitted to increase benefits provided by the plan (ie X-mas bonus). The law permits pension plans to reduce, or even eliminate, future benefit accruals under the plan. If the Trustees determine that future benefit reductions are necessary, you will receive a separate notice explaining the effect of those reductions.

Funding Improvement Plan

Federal law requires pension plans in endangered status to adopt a funding improvement plan aimed at restoring the financial health of the plan. This is the second year that the plan has been in endangered status. On August 11, 2010, the Trustees adopted a funding improvement plan that is expected to eliminate the funding deficiency on, or before September 30, 2022.
