Volunteer in a program to help them lower their health risks and improve their overall health. The member is identified as someone at elevated risk. The member is enrolled in a Volunteer Wellness program to be trained in risk and framed to help them reframe their risk. The program is based on the answers in the HRA; the member may be identified as someone at elevated risk. The member is then assigned to a large group of employees/dependsents. The program is designed to help the member identify new health risks and then suggest tools to help reduce those risks. One of the primary objectives of the Wellness program is to be successful in reducing health care costs. The member will be able to reduce their health care costs by 19% since 2006. Our Wellness programs have been able to reduce our total gross medical costs per employee by 19% since 2006. Our Wellness programs have also enabled us to reduce the cost of health care for our employees, dependents, and their dependents. We have been successful in improving our members' health awareness across the country. We have been very successful in improving our members' awareness of their overall health. We have been able to reduce our total gross medical costs per employee by 19% since 2006. Our Wellness programs have been able to reduce our total gross medical costs per employee by 19% since 2006. Our Wellness programs have been able to reduce our total gross medical costs per employee by 19% since 2006. Our Wellness programs have been able to reduce our total gross medical costs per employee by 19% since 2006.
