Organization: Freedom Works

General Comment

The federal government has no business seizing and controlling peoples' personal financial/retirement accounts and interfering with the financial communications between individual investors and their financial planners. Given the federal government's record on the national debt and how they manage their accounts, I most definitely know that the financial decisions I make with my personal financial planners will be a lot better than any decisions/ financial planning tools the federal government tries to implement on behalf of the U.S. citizens.
