Subject: RIN 1210-AB Inputs

Sir/Madam,

I have just seen your plan to annuitize individual defined benefit and defined contribution retirement plans. I am strongly against this type of regulation. I am extremely aware of both plans that I have at my company. I do not need your assistance in managing my future incomes. I suspect that there will be a "fee" (tax) for this government assistance. If you want an uprising among the working class, keep on with this proposal. I would rather give my money away to political activities that will rid us of this socialist course. Give it up.
