Subject: RIN 1210-AB33. NO!

Dear sir/madam,

Do not in ANY WAY take money from my retirement fund and force it into an annuity of your choosing. This would be outright government theft and would mark the true convergence of our country with the likes of such well run Kleptocracies as Argentina. It would only benefit you spendthrift political hacks and the current crop of Banksters who have co-opted our government.

Any elected official who works to make this possible will be thrown out of office by me and the millions of citizens whose savings are threatened by this proposal. The new crop of elected officials will then fire you bureaucrats in the treasury who helped make this possible.

So STOP. Go no further.

Chris Baker
