To you bureaucrats - Concerning your proposal to confiscate our retirement money in exchange for a federal annuity....GET OUT! Get out of our lives!!! We have had it with more hare brained federal scheming to steal our money, steal our rights, attempt to control more of our lives. Your phoney arguments are rejected, period.

It should not be hard to understand that American citizens reject what you are trying to do. Drop it, push yourself away from the desk and go find more productive things to do.
