I am concerned and opposed to any government regulation that requires that 401K or other employee retirement plans be converted to lifetime annuities. Such regulations or other forms of government intervention smacks of another for Social Security Admonition program, a program that has been totally "botched" by the US government. The retirement money that I paid into Social Security has disappeared. Your plan will lead lawmakers into repeating that mistake again. Lawmakers must elsewhere to fix the current federal debt problem.

Such discussions and resulting regulations will likely result in the US gov confiscating my retirement assets for spending on near-term national "debt reduction" and other social program funding.

Do not take away my freedom of choice. Enough is enough!
