General Comment

I believe that every effort should be made to increase the number of individuals covered by PPACA, especially as of January 1, 2014 when most of the reform components (Insurance Exchanges, Subsidies, Tax Credits, etc.) come into play.

The average consumer has a broad definition of "benefits." Consumers view their health plan beyond the covered benefits, cost sharing, and the contribution levels associated with the plan.

It is my opinion that the Rule may still result in some confusion to the marketplace in its application. For example, if an employer raised the copayment level beyond the maximum in one area (i.e. outpatient services) but retained the copayment level for primary care doctor visits, does that mean a loss of grandfather status? Clarity will be critical both for the employer and the employee.

The Rule needs to be clear, reasonable, and with no ambiguities involved in determining whether a group health plan is "in or out." The decisions the federal government makes today will determine the outcomes for tomorrow. We may need to make some difficult decisions to create a sustainable health care system that will support a growing economy in the future. That means getting as many citizens across the country participating at the beginning to make it work and delivering on its promises to retain their support.

Thank you for the opportunity to comment on this regulation.

Gary Brown
