Subject: Protection of Conscience and the Patient Protection and Affordable Care Act
Date: Thursday, August 04, 2011 1:16:19 PM

To whom it may concern:

It is critical that protection of conscience be part of the foundation of the Patient Protection and Affordable Care Act. Specifically, for reasons which are ethically and scientifically sound, contraception should not be a mandated preventive health service. At minimum, a robust conscience protection should be granted.

Respectfully,
Margaret Frank
