---

I am writing you to ask that the **Rights of Conscience Act (H.R. 1179)** needs to be part of our HealthCare bill. I know that the average person does not wish for abortion to be part of health care nor do they wish to pay for others to have these services. This is not health care - the killing of children. This also affects the moral rights of those who wish to prevent this happening in our world that they would have to participate in putting the healthCare plan into effect. Please consider everyone in this. Please know that pregnancy is not a disease and that reasonable and robust conscience protections should be enacted for all Americans, not just "religious employers." Thank you for your time. Dayle Rutledge, 431 E Church St #A, Santa Maria CA 93454
