Dear HHS:

It has been brought to my attention that this government office has mandated that all insurance companies distribute contraceptive chemicals and abortifacient chemicals as a preventive health care. Furthermore, no provisions were included to account for religious or moral beliefs that disagree with this mandate.

I am appalled that a servant of the people, which HHS is, should arrogantly propose requirements that insult humanity and harm the very citizens it is formed to protect. Becoming pregnant is a very conscious act incorporating the will of two people. It is not a disease or a disfunction. While the couple may be short sighted or irresponsible in their actions does not negate their responsibility to the creation of a new human being. Whether avoiding the procreative determination or terminating a life, man and woman commit a criminal act. And the HHS is a major conspirator to grave illegal actions. In simpler terms, HHS is committing crimes against humanity warranting world condemnations and sanctions.

I adamantly oppose these rules imposed upon insurance companies and upon anyone forced to support them directly or indirectly. Your actions seem suspiciously Socialist with a bent for Karl Marx.

Let me strongly remind you that I am

an American Citizen

Craig Pavageau
