To Whom This May Concern:

I am gravely concerned over the recent Federal mandate that require health plans to provide the full range of FDA-approved contraceptive methods, as "preventive health services" for women." As a tax payer, and as a devout Christian practicing my faith in ALL areas of my life, I am dumbfounded regarding the lack of respect for life and lack of respect for conscience which is foundational to a just society.

I am asking, as a taxpayer, for a reconsideration of this mandate. At a minimum I am requesting that a robust conscience protection be granted, not only for all religious employers, but also for all employers, insurers, and policy issuers with moral, ethical, or religious objections. As it is, the limitations contained in the regulations for religious employers make the exemption virtually meaningless.

To make me pay for, and therefore be a part of, this poor decision to mislead the american people as well as kill innocent life that can not speak for itself is unjust and unamerican. Please reconsider.
