*To Whom it may concern,
I am deeply disturbed with the new proposed mandate that all employers are to provide coverage for contraception as part of the 'Obamacare' healthcare. Particularly the regulation saying that religious organizations can only serve people of 'their own faith'. This is ridiculous! Religious, 'faith-based' organizations provide millions of dollars worth of healthcare and charity to ALL who are in need, not just those of their own faith.*

I am aghast at the way, once again, this administration turns it's cheek to the wishes of the American people!!! You, as our elected officials are there to SERVE the public, not shove policy through without regard to what the American people want.

This is an outrage and I am writing to ask that you not pass this policy!

With due respect,

Cheryl Carlson
