Mandating private health insurance companies is out of bounds and certainly biased in favor of your opinion. I thought this was a country of the people.

At the very least, moral and religious objections are to be addressed and they have been run over rough shod. Why would I throw money at what has become birth control; otherwise known as murder. Why would I do business with a company or country that runs life in this manner?

"Religious employer defined is...? I see violations of discrimination.

Change the way you do business by using slippery language and over-reaching.

Sincerely,
Barbara Dyk
Grandville, MI 49418
