## General Comment

Please include coverage of contraception under the preventive health services portion of the health care reform law going into effect on September 23rd. Contraception is an enormous part of preventive health care for women, and access to wide-ranging contraceptive care is in the best interest of women's health, children and our communities.

I will not accept further unnecessary and unreasonable delay in access to contraceptive care as preventative health services.

It has already become clear that women's health is not valued as highly and access to COMPREHENSIVE women's healthcare has already been jeopardized enough under the new health care reform.
