Subject: New 5500 Schedules and Reporting

We have reviewed various proposed reporting requirements. The burden imposed by Government on employers for reporting information that the Federal and State Governments do not have the personnel to review or act upon is creating the necessity of full time positions just to comply. This use of resources is taking away from an organizations ability to run its day to day business. We are already reporting employer and employee contributions on the 1095 C and 1095B forms. Most of the information requested could be obtained from other sources within the Federal Government. It would be more practical and efficient if the various agencies would call a summit and create an information sharing vehicle. An integration of information systems among your various agencies would provide all of the data you could possibly want without overburdening the business sector.

Thank you.
