General Comment

Although this is not a forum for political debate, it does show the inability of government to fully understand the implications of rules imposed upon the employer and DOL penalties imposed by DOL have always been excessive. \$5K and 20K is pretty standard, There is this gap between what government sees as a mandate and reality. So I suggest that government charge each employee with a \$100 annual fee to be collected when they file their tax return to cover the cost. With high dissatisfaction rate of government by small business owners. regulation forces the use of much cheaper NAFTA company to assemble parts than the cost of health insurance for a factory worker reaching age 60 and and employer contribution of \$25,000. So the approval rate will be as follows, employees 100%, Government employees 100%, Unemployed don't vote. 35% of all votes a no based upon ownership of small business.
