## General Comment

My husband and I are retired and have ALL our savings invested with Morgan Stanley. If we cannot have confidence that our investment advisor is putting our interests first, we will suffer from even more anxiety about our financial security and possibly be faced with trying to manage our money ourselves. It seems obvious that conflicts of interest are counter to the interest of the people served, but since President Trump seems to endorse them, I wanted to communicate that ordinary Americans like us, who depend upon financial advisors to handle their money in good faith, do not.
