

TO: Dept of Labor

Greetings,

Do NOT delay or weaken the proposed 'fiduciary duty' rule that would prevent Wall Street from scamming America's retirees out of billions of dollars each year! Industry has had plenty of time to prepare for this LONG-DELAYED rule. It will help retirees by eliminating bad products that cost them money, reorient the retirement industry to put investors first, and give investors recourse if brokers continue attempting to scam them. Any further delay and/or weakening of this rule is nothing more than a transparent gift to the financial services industry at the expense of everyday Americans!

Thank you,
