To: Talk to DOL

Subject: Freedom

The United States has an awesome military to defend our freedom! Yet this Government legislates our freedoms away almost on a daily basis. I own a small brokerage firm and have been harassed by FINRA since the NY Govonor Spitzer was in office. Now we have another agency to appease. The ridiculous, very expensive, completely unnecessary rules coming down upon us from the DOL and enforced by the IRS is nothing short of disgusting. You build a business in this country and a handful of big government politicians swipe a pen and turn it upside down.

For the last 20 years my biggest worry is what will my government do next to make life miserable. I got excited with our new president, I donated to this presidents campaign. I got excited for no reason and I waisted my money. Going back and forth with rumors of this newest and latest piece of theft being delayed and ultimately dead is now going into force on June 9. This business is misserble and near impossible because of you people. Enjoy your gauranteed salaries, raises, pensions, health Insurance! This Government is tyrannical, opportunistic, abusive and evil. My new hobby is motorcycle riding...in my last reach for that old feeling of freedom I will twist my wrist to full throttle and find a nice big tree. I'm tired, I give up, I no longer want to live under your thumb!
