Subject: Fiduciary rule needs to stay! From Repub

Employee Benefits Security Administration U.S. Department of Labor,

I am a republican and usually do not agree with EPI on a lot of matters but why would an advisor not be a fiduciary. I got ripped off by an advisor years ago. Plain lied about risk of a security.....

The "fiduciary rule" aims to stop the losses savers incur when steered into products that earn advisers commissions and fees. Conflicted advice costs retirement savers \$17 billion each year. It's vital that the labor department implement and enforce the rule in its current form. I urge the Department of Labor not to water down the fiduciary rule's enforcement provisions and not to create massive loopholes in this common-sense protection for current and future retirees.
