Subject: RIN 1210-AB82 Protect retirees: Fully implement and enforce the fiduciary rule

Employee Benefits Security Administration U.S. Department of Labor,

Trump seems to be doing his best, not to help the common man, but to hinder him in any way possible.

We Americans are in the midst of a retirement security crisis—depending on every dollar we can save to afford a basic standard of living. Conflicted advice costs retirement savers \$17 billion each year. The current fiduciary rule is the right way to deal with this problem. Nothing about the fiduciary standard constrains financial advisers from providing broad-based investment advice to their clients—it would simply require them to do so with increased transparency and reduced conflicts of interest. I urge the Department of Labor to protect working people and retirees by fully implementing and enforcing the fiduciary rule.

We need, obviously, someone to stand up and protect we retirees and the working people from his Secretary of Labor, Acosta, and Trump. Please help us.
