## General Comment

I am writing as a retiree who has a portion of my equity investments in ESG funds, specifically one managed by Calvert. Their performance is excellent and matches well with competitors.

I find your proposed order to be reprehensible. Do you actually think that these fund managers or financial advisors would want returns to be any lower than other fund managers?

ESG funds are based on sound principles that promote honorable corporate leadership, sound decision making and ethics. You are proposing these rules to protect the fossil fuel industry and not look out for investors. We have choices and can make our own decisions.

Do not implement these proposed rules.
