## General Comment

I strongly oppose the implementation of this rule. We chose to invest our retirement money based on our priorities as a family. The administrators of our plan offer socially responsible options because some of their customers prefer to invest in them. This rule is forcing investors to prioritize certain industries rather than giving them a choice. My tax dollars subsidize the oil companies already. I choose to invest my retirement money in the future of alternative energy. To force me to do otherwise is unethical.
