General Comment

RE: Proposed rule on Financial Factors in Selecting Plan Investments (RIN 1210-AB95)

To whom it may concern:

I write to provide comments in response to the Department of Labor's proposed rule, "Financial Factors in Selecting Plan Investments" (RIN 1210-AB95) (the "Proposal").

The Department of Labor fails to articulate a rational connection between the relevant facts and the proposed rule. The Proposal reveals a fundamental misunderstanding of how professional investment managers use environmental, social and governance (ESG) criteria as an additional level of due diligence and analysis in the portfolio construction process. Investment managers increasingly analyze ESG factors precisely because they view these factors as material to financial performance.

The proposed rule assumes ESG strategies sacrifice financial returns, but current research findings show ESG strategies' outperformance.

The Proposal is likely to have the perverse effect of dissuading fiduciaries, even against their better judgment, from offering options for their plans that consider ESG factors as part of the evaluation of material financial criteria. As a result, it will unfairly, and harmfully, limit plan diversification and perhaps compel plan participants to choose options that are either more risky or less profitable.

I respectfully request that the Proposal be withdrawn. Thank you for your consideration of these comments.

Sincerely,
Erica Bleicher
