Document: EBSA-2020-0004-DRAFT-0304
Comment on FR Doc # 2020-13705

Submitter Information

Name: Lindsay Speer

General Comment

It has been challenging enough to be able to choose to invest my retirement funds in Socially Responsible Investing. Please do not make it harder. With prior employers I didn't even have a choice. But when my 401(k) rolled over I chose to work with a local investment broker that had Socially responsible investing as a core value. This is very important to me to be able to have this choice, and to expand access to this choice. It should not be the only choice for Americans to have to either invest their hard earned retirement funds into companies that are hurting society or just leave the money in the bank. That is unacceptable. We should be able to choose where our money goes.
